PARENT COMPANY FINANCIAL STATEMENTS

SIGNIFICANT EVENTS

DISPOSALS – PROJECTS

- Transfer of Bouygues Energies & Services to Equans (January 2023)
-

PROJECTS HANDED OVER

- Issy Cœur de Ville eco-neighbourhood, Issy-les-Moulineaux (France)
 - Paris-Saclay University (France)
 - Morland Mixité Capitale property complex, Paris (France)
 - Mohammed VI University, Ben Guerir (Morocco)
 - Hôtel Martinez, Cannes (France)
-

CSR

- Bouygues Construction accredited as “Top Employer France” and “Top Employer Europe” by the Top Employers Institute for its good HR practices^a
- Application for SBTi accreditation to be submitted in 2023

PROJECTS UNDER CONSTRUCTION

- Fécamp offshore wind farm (France)
 - High Speed 2 rail link (UK)
 - Grand Paris rapid transport link, Line 15, packages T2A and T3A (France)
 - Abomey Calavi Hospital (Benin)
 - Melbourne metro and WestConnex tunnel, Sydney (Australia)
 - Hinkley Point C EPR (UK)
-

MAJOR CONTRACTS SIGNED IN 2022

- Quais-Vernets eco-neighbourhood, Geneva (Switzerland)
- Data Centre, Les Ulis (France)
- Pharmaceutical laboratory, Warsaw (Poland)
- Belliard property complex, Paris (France)
- Pier 66 Hotel, Florida (USA)
- SMS Sport Centre (Hong Kong)
- Qiddiya Six Flags (Saudi Arabia)

MANAGEMENT REPORT

Unless otherwise indicated, the presentation of Bouygues Construction's profile and strategy provided below relates solely to Building & Civil Works, given that Bouygues Energies & Services was transferred to Equans on 1 January 2023.

I - INTRODUCTION

With nearly 53,000 responsible, dedicated employees (including over 32,000 in Building & Civil Works) in around 60 countries, Bouygues Construction designs, builds and operates projects in the building and civil works sectors.

Bouygues Construction is acknowledged as a benchmark player in sustainable construction, delivering numerous eco-neighbourhoods, low-carbon (timber-frame) buildings, and structures certified to the world's best eco-standards, as well as upgrading sites to reach positive-energy status^a. We also develop circular economy business models, from the design phase of projects to recycling the waste they generate.

We are increasingly involved in high value-added large-scale structures, and in more all-encompassing projects ranging from neighbourhoods to connected cities.

Following the acquisition of Equans by the Bouygues group on 4 October 2022 the Energies & Services business, consolidated by Bouygues Construction up to and including 31 December 2022, was transferred to Equans as part of the creation of the Bouygues group's new Energies & Services arm.

1. GROWTH STRATEGY AND OPPORTUNITIES

With the ultimate goal of combining business performance with environmental performance, Bouygues Construction is launching a new strategic plan with the following objectives:

- **be a global player in places where we have a long-term presence**, like Australia, France, the UK, Hong Kong and Switzerland, by drawing on our innovative products and services, while also **developing one-off projects** with local partners;
- **extend our geographical footprint** to new high-potential developed territories;
- **in our Building operations, be a leader in refurbishment and regeneration** whilst **boosting** our **property development** activities via our Linkcity network; and

- **in our Civil Works operations, continue to be a top-notch player in the major infrastructure market** (bridges, tunnels, nuclear power plants, offshore wind power) in France and abroad, and expand our activities in the growing market for infrastructure repair work.

In everything we do, we:

- **give top priority to the health and safety** of our employees and partners in all our projects;
- **make shared innovation our primary source of added value** and propose full-service offerings that meet customer needs, capitalising on our expertise in markets in key markets (regeneration, office space) and sectors (residential, healthcare, hotels, data centres, etc);
- **pursue customer satisfaction over the long term**, in particular by ensuring tight control over execution, delivering high-quality products and services, and through after-sales support;
- **digitise our building methods** in order to improve productivity; and
- **use digital technology as a strategic avenue of growth**, via the design of new products and services and the use of digital solutions within our own business activities.

2. CLIMATE AND BIODIVERSITY STRATEGY

AMBITIONS

Across all our operations, we are intensifying our actions in innovation and renewable energies, and rolling out our Carbon strategy.

Our ambitions are to:

- **make the transition to a low-carbon economy a major growth driver** and generate business growth opportunities by offering customers distinctive, high value-added products and services to minimise the carbon impact across the entire value chain;
- **pioneer the integration of solutions** for producing, storing and distributing decarbonised energy (solar, nuclear, hydrogen, etc.); for making buildings, neighbourhoods, towns and cities more energy-efficient (positive-energy buildings, "zero-carbon" neighbourhoods, etc.); and for supporting the development of low-carbon mobility (electric mobility, rail infrastructure, etc.);

(a) A building which, in operation, produces more energy than it consumes.

- **reduce our direct and indirect emissions** by 2030 **versus 2019** (by 40% in absolute terms for scopes 1 and 2, by 30% for scope 3 in Building, and by 20% for scope 3 in Civil Works);
- **offer solutions to our customers** that allow them to address the challenges of ecological transition; and
- **continue rolling out eco-design solutions**, including bio-source materials; timber construction (with our "WeWood" approach); research and development in low-carbon concrete; recycling and reuse with the Cyneo platform; drastic reductions in onsite waste; and energy-saving measures.

ACTION PLAN

Our action plan to create a low-carbon culture involves:

- **reducing the carbon intensity of our operations** by focusing on design and building methods (timber construction, etc.), procurement (especially priority packages such as concrete, steel, facades and external joinery), and the energy consumption of our worksites;
- **developing and promoting our expertise, skills and flagship projects** in solutions for a low-carbon world;
- **introducing carbon trajectory tracking tools** to align our climate roadmap and our business plans (revisiting management cycles, and embedding carbon footprint measurement in the commercial, design and site-work phases of our projects);
- **training our people in climate-related issues.** Over 12,000 of our employees have already received such training, representing 43% of our managerial, administrative, clerical, technical and supervisory staff. Our target is for 100% of such staff to have received climate-related training by the end of 2023; and
- **championing biodiversity** in our infrastructure and building projects by developing innovative solutions that protect existing on-site wildlife and ecosystems, and by reintroducing nature into urban environments.

We have also implemented an energy-saving plan that aims to:

- **accelerate the rollout of energy-efficient solutions** at our worksites (like timber-built and/or low-energy site huts);
- **reduce energy consumption** in our headquarters and branch office buildings; and
- **optimise consumption from staff travel** (continuation of working-from-home policy, eco-driving courses).

Bouygues Construction is applying for SBTi (Science Based Target initiative) accreditation. In early July 2022, we submitted our greenhouse gas reduction targets for the 2021–2030 period to the SBTi committee. Our trajectory is currently being audited by the SBTi committee, which will express an opinion as to whether it is compatible with limiting average temperature rises to 1.5°C on scopes 1 & 2.

3. STRENGTHS AND ASSETS

To deliver on its strategic plan, Bouygues Construction can count on:

- **know-how** through the talent of employees in around 60 countries who share the same customer-focused values;
- **positioning that spans the entire value chain** of the construction sector in the digital era;
- **acknowledged expertise in production infrastructure projects** from renewable energies and digital (data centres) to public and electric-powered transport networks, **and in refurbishment and urban regeneration projects;**
- **the ability to mobilise resources and offer innovative solutions** for major projects anywhere in the world, making us a key player in delivering infrastructure and buildings for a low-carbon planet;
- **distinctive, high value-added products and services** based on long experience of managing complex projects, specific knowledge of sustainable construction and constant innovation in all its forms; and
- **the ability to adapt to changing markets:** the level of our order backlog provides good visibility, enabling costs to be adjusted while focusing commercial investment on the most dynamic markets.

4. MARKET POSITION

Given the organisational structure of our direct competitors and recent changes in the composition of many groups in the sector, it is difficult to make like-for-like comparisons between them and Bouygues Construction.

- **In the world:** in the ENR ranking of international contractors^(b), the Bouygues group's construction arm (represented by its three business segments: Bouygues Construction, Bouygues Immobilier, Colas) rose by one place to **fourth when based solely on its share of sales generated in international markets** (the same ranking as it held in 2020).
- **In Europe:** based on the 2021 rankings published by trade magazine Le Moniteur in December 2022, the Bouygues group's construction arm (Bouygues Construction, Bouygues Immobilier, Colas) is the **second largest in Europe** after Vinci (France) but ahead of ACS (Spain), Hochtief (Germany) and Eiffage (France).
- **In France:** according to the same rankings, Bouygues Construction (based on Building and Civil Works activities) is **one of the top three contractors** behind Vinci Construction and ahead of Eiffage (construction activities, excluding property development and infrastructures).

(b) ENR Top 250 Global Contractors and International Contractors survey, 2022.

II. REVIEW OF OPERATIONS, RESULTS AND FINANCIAL POSITION

1. KEY FIGURES*

- **32,400 headcount**
- **€9.3bn sales (57% international sales)**
- **€14.1bn order backlog**
- **€3.6bn of net surplus cash**

2. BUSINESS PERFORMANCE

ORDER INTAKE UNDERPINNED BY CORE BUSINESS PROJECTS

In 2022, our order intake came to €8.5 billion, up 23% on 2021. The increase was mainly due to a high volume of contracts individually worth less than €100 million.

In France, the order intake was similar to 2021 at €3.5 billion. That figure includes the Belliard mixed-use property complex in Paris, and the Les Ulis data centre.

Internationally, the order intake reached €5 billion, 47% higher than in 2021, and included a number of very large contracts – especially those in Hong Kong (SMS Sports Centre & Vehicle Park), Switzerland (Quai des Vernets) and the Middle East (Six Flags Qiddiya Theme Park).

BACKLOG REMAINS HEALTHY

The backlog at end 2022 stood at a high €14.1 billion (up 1% on end December 2021, but down 2.1% like-for-like and at constant exchange rates), with international markets accounting for 67%. Europe was the largest international market, ahead of the Asia-Pacific region. At end 2022, orders to be executed in 2023 amounted to €8 billion.

SALES DRIVEN BY INTERNATIONAL MARKETS

Sales were €9.3 billion in 2022, up 5% versus 2021 (up 1.2% like-for-like and at constant exchange rates).

French sales held steady at €4 billion, representing 43% of total sales.

International sales totalled €5.3 billion, 8% higher than in 2021.

IMPROVED OPERATING PERFORMANCE

Current operating profit from activities (COPA) reached €276 million, up €42 million year-on-year. Current operating profit was at the same level as COPA, both in absolute terms and in year-on-year performance. Consequently, both COPA margin and current operating margin amounted to 3% of sales. This represented a year-on-year improvement of 0.4 of a point despite a backdrop of high inflation, hiring difficulties in some regions, and cost volatility.

Net profit attributable to the Group was €311 million, versus €282 million in 2021.

HIGHEST-EVER NET SURPLUS CASH

Net surplus cash at end 2022 stood at an all-time high of €3.6 billion, up by around €0.4 billion on what was already a good 2021, despite the challenging economic conditions.

3. DEVELOPMENTS IN OUR MARKETS AND ACTIVITIES

BUILDING AND CIVIL WORKS

Sales in Building and Civil Works came to €9.3 billion, 5% more than in 2021. International sales advanced by €400 million year-on-year, and accounted for 57% of the total.

France

2022 sales: €4 billion (stable)

Building activities in France saw a fine performance from core business projects plus some significant new contracts such as the Belliard mixed-use property development in Paris, a data centre at Les Ulis, a logistics centre at Noeux-Les-Mines and the Lille municipal offices complex.

A number of contracts are under way ahead of the 2024 Paris Olympics, including the construction of the Aquatics Centre and the A2 island of the Olympic Village in Saint-Denis. Work is also continuing on the Porte de la Chapelle arena, the Engie campus at La Garenne-Colombes, and the Crédit Agricole Centre-Est headquarters at Champagne au Mont d'Or. Urban regeneration and eco-neighbourhoods are also opening up interesting opportunities, such as the Issy Cœur de Ville project in the Paris suburbs that was handed over in 2022.

Our Civil Works operations held up well in 2022, sustained by work on the Fécamp offshore wind farm and, in Paris, on the RER Eole East-West Express Rail Link and packages T2A and T3A for Grand Paris Express Line 15.

* Excluding Energies & Services businesses, transferred to Equans in January 2023

Europe

2022 sales: €2.6 billion (+10%)

In the **UK**, Bouygues Construction is involved in several urban regeneration projects, such as the Hallsville Quarter and Tustin Estate in London. We are also present in the education sector, with the construction of a student residence at the University of Essex campus in Colchester.

2022 was a turning point for our work on large infrastructure projects, with:

- The Hinkley Point C nuclear power plant, where in December 2022 the last of the three steel rings was installed on the structure that will house one of the two reactors. The plant will eventually meet 7% of the UK's electricity needs, supplying power to over five million households.
- The HS2 high-speed rail link that will connect central London to Birmingham and Manchester. The project reached a milestone late in 2022 when the two boring machines completed 8 of the 16 kilometres of tunnel under the Chiltern Hills.

In **Switzerland**, Bouygues Construction extended its footprint in office space and residential development, with eco-neighbourhood projects like:

- Quai des Vernets, which will provide 1,355 housing units that will ultimately be 100% powered by renewables, and – in one of the key features of this development – will be restricted to cyclists and pedestrians.
- Côté Parc, a sustainable neighbourhood that includes designing a 5-hectare park in the heart of Geneva.

In **Central Europe**, we signed two substantial new contracts: an office project in our Polish subsidiary, and an industrial project for our Czech subsidiary.

In **Monaco**, work is ongoing via our local subsidiaries on the Grand IDA mixed housing development and the Villa Lucia project.

In **Croatia**, our core activity is the dualling of a section of the Istrian motorway, with the design/build of the second tube of the Učka tunnel.

Asia-Pacific

2022 sales: €1.7 billion (-9%)

In **Asia-Pacific**, we have developed our expertise through our Building and Civil Works subsidiaries so that we now have long-established local operations, especially in Australia, Hong Kong, Singapore and Thailand.

In **Australia**, Bouygues Construction has completed work on the WestConnex tunnel in Sydney and on the Melbourne metro contract. Thanks to our subsidiary AW Edwards, we are now firmly established in the Australian construction sector, particularly with the Crows Nest metro station project and data centres in Sydney.

In **Hong Kong**, several major underground projects are underway, including the Central Kowloon Route and the T2 Trunk Road undersea tunnel. The latter forms part of the government's Route 6 road link project, which aims to relieve traffic congestion in central Kowloon. Other major projects have also started, including construction of a fire station and a sports centre.

In the **Philippines**, Bouygues Travaux Publics continues to work on the extension of the Manila metro.

Africa – Maghreb – Middle East

2022 sales: €0.6 billion (+57%)

Bouygues Construction has a selective approach to projects in this region.

In **Morocco**, we continue to demonstrate our expertise in building, taking just ten months to hand over the nine buildings in the Science and Technology faculty of the Mohammed VI Polytechnic University.

We also have a presence in **Benin**, where we are building the Abomey Calavi University Hospital.

In **Saudi Arabia**, we won a contract to build a theme park, part of the country's strategy of developing a post-oil economy.

In **Egypt**, we are still working on the construction of Cairo Metro Line 3.

In the **Democratic Republic of Congo, Ivory Coast, Guinea-Conakry and Mali**, Bouygues Construction is in charge of earthworks for opencast mining at the gold mines located in Kibali, Tongon, Tinguilinta and Goukoto respectively.

Americas – Caribbean

2022 sales: €0.5 billion (+38%)

There are opportunities in the Americas as a result of the public authorities' stated intention of rebuilding infrastructure.

In the **United States**, we have a well-established presence and are involved in several large projects, including a logistics centre and two hotel complexes – one of which, Pier 66, involves a combination of major refurbishment and new build on the site of a former beach resort.

We are also building a water collection tunnel at Pawtucket, south of Boston.

ENERGIES AND SERVICES

The Energies & Services arm – comprised of the subsidiaries Bouygues Energies & Services, Bouygues Energies & Services InTec, and Kraftanlagen – operates in digital networks, electrical and HVAC engineering, facilities management and services to industry.

As a general rule, both in France and abroad, improving the energy efficiency of buildings is becoming key due to the increasing demands of industry (building management systems, smart buildings, smart cities, energy consulting, etc.), environmental challenges, demographic growth, and the growing scarcity of raw materials. Telecommunications needs are also driving the growth of network infrastructure.

These large-scale market trends, along with ambitious governmental targets to increase the share of renewables in energy production, open up new growth prospects in both mature economies (Germany, Canada, France, the UK, Switzerland) and emerging countries, particularly in Asia.

The Energies & Services arm contributed €3.9 billion to the consolidated sales of Bouygues Construction in 2022, stable relative to 2021, reflecting a selective approach to contracts. During 2022, the nuclear operations formerly housed within Bouygues Energies & Services were transferred to the Building and Civil Works division.

Bouygues Energies & Services became part of Equans on 4 January 2023.

France

2022 sales: €1.3 billion (-4%)

Growth at Bouygues Energies & Services is coming from involvement with local authorities' digital development policies; these projects are undertaken in partnership with Axione. Numerous large-scale contracts are under way, including a FTTH (Fibre to the Home) project to increase coverage in Brittany, and in the Oise and Pas-de-Calais regions of northern France.

Bouygues Energies & Services is involved in numerous construction and renovation projects in the building sector, offering expertise in electrical, mechanical and HVAC engineering, in particular the Saclay Paris Sud University project.

International

2022 sales: €2.6 billion (+2%)

Bouygues Energies & Services is developing its facilities management activity in the **United Kingdom**, for example with the Southmead hospital in Bristol.

In 2022, Bouygues was selected by the operator HQ Cloud to design and build a data centre in **Germany**.

In **Canada**, the company provides facilities management services for Surrey Hospital and the Royal National Mounted Police headquarters. Facilities management provides Bouygues Energies & Services with a long-term revenue stream. In 2021, Bouygues Energies & Services also won contracts to build the St Paul Hospital in Vancouver and the Corner Brook Hospital in Labrador.

Bouygues Energies & Services develops turnkey photovoltaic solutions. In **Japan**, for example, it is finalising the construction of a solar farm in Tochigi prefecture.

III. RESEARCH AND DEVELOPMENT ACTIVITIES

1. SHARED INNOVATION AS CUSTOMER SERVICE

As Bouygues Construction continually adapts to meet customer needs, its main strength is shared innovation. We are driving innovation at every stage in the value chain:

- **In the design phase**, Bouygues Construction highlights its expertise in Building Information Modelling, which can be used to manage all the information needed to design and build a structure.

We can expect to see digitisation gather pace in the years ahead. Improvements in data capture and processing will pave the way for the development of digital twins, generating efficiencies in workflow management and reducing the gap between forecasts and outcomes. In 2023, Bouygues Construction is due to complete a project to finalise a roadmap and identify priority use cases for digital twins. Since 2021, Bouygues Construction has been part of a digital twins research alliance alongside ESTP, ENSAM, Schneider Electric, Egis, SNCF Réseaux and BRGM.

Digital twins can also deliver solutions further upstream in the value chain. Working with our partner Dassault Systems, we are drawing inspiration from design and production methods used in the aeronautics, space and automotive industries and from university research (at Stanford, ETH Zürich and Centrale Lille) to initiate new design solutions for buildings: our MDO project makes it possible to shift from a limited, sequential design process to a multi-disciplinary, parametric design process – leading to significant optimisation. Another project (ALICE, developed by the Plan Group) will enable fluids to be generated automatically in Revit building information modelling software.

Finally, virtual reality (VR) and augmented reality (AR) – which have emerged in recent years as technologies that could radically change how we live and work – require further work to establish their value in a range of use cases, from safety training and ergonomics to virtual and interactive tours. As part of this process, our R&D unit runs the "DesignLab" facility at the Challenger building, which demonstrates to our employees tried and tested technologies developed by R&D.

We have also developed a "serious game" that all stakeholders can use to imagine how the neighbourhoods of the future will look.

Launched by Bouygues Construction a few years ago and drawing on play-based tools including the serious game concept, CityPlay is developing into a fully-fledged co-construction approach to urban development.

The aim is to imagine and build – in conjunction with residents, neighbours and stakeholders – a more resilient, inclusive and intelligent city. The CityPlay approach uses a set of play-based, online and face-to-face solutions to transform cities: citizens and users become designers, and residents are fully engaged.

Examples include:

- future workshops, to help local authorities plan their strategies;
- serious games, to co-construct a project with end users;
- spatial planning of unique, hybrid places, to create the future user community; and
- intrapreneurship: incubating citizen projects, so that hyper-local initiatives can emerge.

Solutions like these can tap into a network of partners (institutions, businesses, universities and non-profits) to support cities with their transformation projects.

The serious game concept has already been deployed on 45 projects, including La Maillerie in Lille (urban spatial planning), Les Fabriques in Marseille (new business start-ups in a makerspace), Share in Tours (serious game), and the Smart City projects developed by Bouygues Energies & Services.

Bouygues Construction also offers local authorities integrated solutions for regenerating industrial wasteland that combine sustainable construction, energy efficiency, a mix of uses, active travel, biodiversity, and new technologies tailored to residents' needs. The Bouygues group has been involved in a number of landmark projects, both in France and internationally.

Since 2016, the Group has been involved in two sustainable city pilot projects in France under the auspices of the Sustainable City Institute (IVD). These two projects – Eureka Confluence in Lyon, and Descartes 21 Marne-la-Vallée in the Greater Paris region – provide a test-bed for disruptive innovations in all aspects of urban living, where normal rules will not apply.

Bouygues Construction's "OSH" offers customers an office building design concept capable of subsequent conversion to residential use, which is being trialled as part of the Eureka Confluence project. More generally, we provide support for customers seeking to repurpose office space as residential units.

Over the last five years, Bouygues Construction has developed closer ties with the academic community.

For the fifth consecutive year, we have worked with the Centrale Lille engineering school on research around Construction 4.0 (leveraging productivity through digitisation and industrialisation).

We have also built closer links to academic researchers including the Center for Integrated Facility Engineering (CIFE), headed up by Prof. Martin Fischer at Stanford University in the USA; the ESTP Paris engineering school; the Cambridge Service Alliance at the University of Cambridge in the UK, on digital twins; and ESB Nantes, on managing forestry resources at a time of growing demand for timber in the construction industry.

These collaborations broaden the scope of our research, especially in emerging trends.

- **In the construction phase**, Bouygues Construction emphasises eco-construction methods and the use of innovative, low-carbon or bio-sourced materials, and provides the keys for constructing buildings aligned on circular economy principles.

Over several years, we have been developing multiple techniques for optimising concrete formulations, in particular by using mineral admixtures (such as metakaolin and milk protein) to reduce carbon emissions. For example, in 2022 we used a concrete formulation developed in our R&D lab with 20% metakaolin to build the Orly Airport footbridge for ADP, with the aim of a 30% reduction in carbon.

We have also developed unconventional materials, such as the use of recovered sand to make mortar. During 2022, our R&D teams trialled alkali-activated cement on a range of building and civil works sites (such as acoustic barriers on the A10 motorway in Tours, and modules at Lavau prison) to establish the conditions and limitations for its use. At present, this type of cement has a carbon footprint 70% lower than CEM I. Based on this trial, we were able to select this clinker-free binder for various projects including the Loiret departmental archive building in Orléans, the ARENA venue for the Paris Olympics, and the Issy-les-Moulineaux station on the Grand Paris Express rapid transit rail system (winner of the Greater Paris Environment Award).

In 2019, Hoffmann Green Cement Technologies and Bouygues Construction agreed a partnership to develop and test concrete formulations using H-EVA metakaolin-based technology. Initial research identified a need for tailored adjuvants, so Bouygues Construction asked the adjuvant manufacturer Chryso to provide technical assistance. Two years of research and fine-tuning have focused on addressing a series of technical issues around slowing or controlling hydration reaction in the binder without impairing workability and mechanical performances. These issues are now starting to be resolved so that researchers can assess the effects on unset and hardened concrete, and monitor creep, shrinkage and durability. As a result, this binder formulation has now progressed to preparation of a Preliminary Technical Evaluation of Material (ETPM). The objective is a carbon reduction of 60%-70% versus CEM I.

As part of our active technology watch initiative, we are planning to explore other research themes linked to climate challenges so we can evaluate their impact, including carbon capture solutions (carbon sinks) with the CLOVERS project; eco-design solutions for infrastructure in a marine environment with the DEMCOM project; and solutions that are positive for biodiversity, resilience and resource conservation.

Industry 4.0 features increased connectivity between tools, machines, people and systems (such as Internet of Things sensors, big data and artificial intelligence) not only within production sites, but also across the entire ecosystem including customers, partners and other production sites. Bouygues Construction responded to these issues in 2021 with the launch of Construction Lab to devise, prototype and test worksite digitisation technologies. Two projects were ongoing in 2022: "Connected Operator" and "Automated Data Capture".

The "Connected Operator" project aims to design a simple, robust interface so that our on-site operators (workers and team leaders) are embedded in the digital chain of our organisational structures, while adapting to ergonomic constraints in the field.

- **In the operational phase**, Bouygues Construction is responsive to customer needs in terms of usage, energy efficiency and optimal infrastructure and utilities management.

The BYSPRONG R&D project has moved up a gear, paving the way for net zero energy refurbishments driven by a combination of industrialisation, digitisation and economies of scale.

The "smart city" concept is constantly evolving. The use of information and communication technology will become increasingly important for the competitiveness of cities. But cities also need to be sustainable, and to ensure that parts of their population are not left behind. The European Union is supporting these activities, and its Horizon Europe program (€95 billion in grant money) will lead to significant investment in addressing the issues raised by growing urbanisation.

Our research is geared towards helping cities perform better: public accessibility of services, infrastructure optimisation, and limiting environmental impacts. During 2022, we worked on urban resilience – specifically, on evaluating and reducing heat island risks in neighbourhood redevelopment projects.

Our R&D teams are adding new skillsets in the collection and analysis of open source data. These include an ongoing parking data collection project with Optimove; a trial at our Losinger Marazzi subsidiary in conjunction with Microsoft; and work to improve the reliability of data capture for our carbon balance sheet. We are also extending our sociological research into urban behaviour and mobility, and accelerating our Datawatcher project – which is becoming a robust tool for monitoring and controlling energy performance metrics for buildings.

Whether city-wide or for individual buildings, we are migrating towards the "smart building" concept – in other words, buildings that communicate and integrate with the "smart city". The core mission of our Connected Buildings unit is to help develop in-house expertise that will make us competitive in embedding new information and communication technologies into buildings via a "Building Operating System" (BOS).

Smalt (formerly known as Wizom) is a start-up created and incubated by Bouygues Construction which delivers solutions that reduce the carbon footprint of a building during its use. Smalt's digital technology tools give users closer control over their individual consumption.

In the UK, Bouygues Energies & Services has completed an LED replacement program covering 90% of its public lighting network, helping Redcar & Cleveland Council in Yorkshire to cut its energy consumption. The energy saved equates to around 1,200 tonnes of CO₂ annually.

Turning to infrastructures, the state of disrepair of many bridges in France and elsewhere is highlighting the importance of timely and appropriate maintenance and upkeep strategies. Monitoring the condition of infrastructure means assessing its fitness for purpose as well as its structural integrity. Our solutions address this with both innovative and mature geophysical techniques. The GEOPONT project, a winner in the French Ministry of Ecological and Community Transition call for projects, focuses mainly on concrete structures – which account for the majority of road bridges. The project draws on two geophysical methods at different stages of technical maturity – geo-radar and active seismic techniques – to construct an overall analytical baseline for a bridge. The ultimate aim is for these geophysical methods to become established as reliable, fit-for-purpose low-cost operational tools for monitoring bridge structures. The solutions delivered will be practical as well as innovative.

2. LEADING PLAYER IN SUSTAINABLE CONSTRUCTION

At the heart of our strategy as a responsible and engaged business is our emphasis on environmental issues.

In a world of dwindling resources, we are developing alternative solutions, such as reusing tunnelling spoil to make concrete for use in building new structures.

Bouygues Construction also designs and constructs buildings that are self-sufficient in 100% renewable energies, and smart electricity supply networks (Smart Grids). We support industrial companies in the production of renewable energies. We also offer our customers innovative infrastructure solutions such as eco-neighbourhoods.

The future of our industry depends on a return to a circular economy. That's not just about renewable energy: we need to design and build structures that require less materials (by optimising usage and surfaces) and can use recycled or (even better) reused materials. For several years, our Circular Design Experience has been exploring how to make this happen within Bouygues Construction R&D. Design and deconstruction tools are currently being rolled out. The next step is to construct a demonstrator building that will use circular economy principles to deliver a low carbon footprint and a sharp reduction in resource depletion.

Since 2012, we have been working across the globe to deliver tailor-made renewable energy projects, from photovoltaic arrays and thermal energy generation to wind farms. In March 2021, the biggest solar farm in the UK went live. The project, at Llanwern in Wales, puts 75 MW into the National Grid. In conjunction with a second solar farm at Strensham, that's enough energy to power 31,500 homes in the UK annually. We are also continuing to expand in Japan, with the signature of a new contract to build the Koriyama solar farm.

In 2021, Bouygues Construction linked up with Mont Blanc road tunnel and motorway operator ATMB and Akuo Energy in the Alp'Hyne Mont-Blanc consortium. This consortium aims to design and operate a renewable hydrogen distribution network, using water electrolysis powered by green electricity generated locally in the Haute-Savoie and Ain regions.

Bouygues Travaux Publics is partnering with Saipem to design, build and install on the seabed gravity-based foundations for offshore wind turbines. With a total capacity of around 500 MW, the Fécamp wind farm off the Normandy coast is expected to generate the equivalent of the domestic energy consumption of some 770,000 people, or 60% of the population of the Seine-Maritime region of Normandy.

A number of Bouygues Construction projects reuse secondary raw materials directly on site. For the Pantin Kanal project (a 20,500 m² office block on the edge of the Port de Pantin development zone in the north-eastern suburbs of Paris), our subsidiary Bouygues Bâtiment Ile-de-France Construction Privée is adopting a circular economy approach. A range of measures are being taken to reduce the project's carbon footprint: recovery and reuse of raised floor panels; metal posts that can be reused through the entire cycle; algae-based paints that are not classed as hazardous waste; and composting facilities at the site office. Another example: in refurbishing the Blomet indoor swimming baths in Paris, Bouygues Bâtiment Ile-de-France Ouvrages Publics repurposed the 900 m² of polycarbonate glazing panels from the old structure to create greenhouses for communal gardens.

Bouygues Construction is experimenting with alternative construction methods, and has strengthened its expertise in using timber (which has a lower carbon footprint). Since 2005, we have used timber for nearly 100 new-build or refurbishment projects in France, the United Kingdom and Switzerland.

For example, Revaion College at Saint-Priest, built by Bouygues Bâtiment Sud-Est for Lyon City Council in partnership with timber-construction specialist Ossabois, is 90% timber (half of which is modular). Using modular timber construction meant that the building was completed more quickly, to a higher standard, and in a more eco-friendly way.

Bouygues Construction is also involved in developing two new accreditation standards: BiodiverCity Life and BiodiverCity Ready. While the existing accreditation scheme takes account of biodiversity in the design and construction phases, the new standards will broaden the scope to include pre-existing buildings or even the biodiversity of an entire neighbourhood. In 2021, 33% of Bouygues Construction projects incorporated biodiversity measures. Our performance on this indicator reflects a better general understanding of biodiversity issues, and a strong commitment among our operational teams to biodiversity initiatives such as species conservation (fauna and flora); ecological continuity measures; and the installation of beehives and community food-growing areas. Bouygues Bâtiment International has issued a guide with 17 practical tips to help operational staff take practical steps to support biodiversity. And Bouygues Bâtiment France Europe systematically applies a process for identifying biodiversity challenges, allowing for input from local environmental groups if necessary.

IV. RISK MANAGEMENT POLICIES

Internal control and disclosures about risks (Article L. 225-100-1, I-3 to I-6 of the French Commercial Code)

1. INTERNAL CONTROL

INTERNAL CONTROL SYSTEMS

The Internal Control and Risk Management Reference Manual of the Bouygues group is based on the reference framework published by the AMF. The Reference Manual covers the general principles of internal control and risk management, and internal control principles relating to accounting and finance. In addition to setting out the general principles of internal control within the Bouygues group, the Reference Manual also identifies good practices common to all the Group's business segments, and applies standard treatments on important transverse issues. Each business segment has supplemented the Reference Manual with principles specifically related to its own activities.

Annual internal control self-assessment campaigns are conducted to check on how well internal control principles are being applied. In selecting which control principles are assessed, priority is given to identified risks and topics. At Bouygues Construction, the self-assessment campaign is usually conducted during the spring and summer, with summary reports presented at the end of the year. The data collected are used to compile findings about the effectiveness of internal control within Bouygues Construction, and to develop and implement action plans with a view to constantly improving the internal control system and risk management. Each entity develops its own action plans. At Bouygues Construction level, managers of the support functions oversee transverse action plans.

Overall, the 2022 campaign involved 346 people in 95 entities or units, representing 90% of Bouygues Construction sales. A total of 36 principles from the risk management and internal control reference manual were evaluated.

Three topics were selected by Bouygues SA:

- PG 03: Organisational Structure Charts and Delegations of Powers
- PG 04: Human Resources
- PG 10: Compliance with Competition Law

Some Bouygues Construction entities opted to evaluate additional topics based on their specific risks and challenges.

The 2022 campaign continued the process of extending the rollout of internal control systems to the entities and units closest to the front line, while identifying areas for progress in the rigour of self-assessment ratings. By providing high-quality feedback and pooling their results, those involved are helping internal control to become a training, team-building and management tool.

RISK MAPPING

Risk mapping is integrated into the Bouygues Construction management cycle. It is submitted to the Audit Committee and the Board of Directors.

This management process provides a shared vision of major risks within Bouygues Construction, with the aim of constantly improving control over those risks and reducing exposure. In addition, synergies between risk management, internal control and internal audit can add value to the organisation's control processes. The annual internal audit plan includes a number of assignments which address the key risks identified by the mapping process.

Risk mapping is updated during the summer and autumn. The work done at entity level is supplemented by contributions from the support functions, forming the basis for risk mapping across the Bouygues Construction group as a whole.

Key risk factsheets, which identify action plans, are updated during the campaign.

RESOURCES DEPLOYED

The internal control rollout strategy adopted by Bouygues Construction reflects the Group's decentralised structure, and the decision to rely on strong and highly-structured support functions. The control environment is adapted accordingly:

Role of the Bouygues Construction holding company

Overall management of the internal control system is handled by a dedicated team within the Audit and Internal Control function, which reports to the Bouygues Construction General Counsel. The holding company plays the lead role in the process, co-ordinates the self-assessment campaigns, and provides methodological support to the entities. It also prepares the Group-level summary report, monitors transverse action plans, and drafts the risk mapping.

Role of the entities

Within the entities, the internal control system is the responsibility of the General Counsel. Internal control correspondents are responsible for the rollout of self-assessment campaigns. The General Counsel of each operational unit is usually responsible for onward deployment within the unit itself.

Role of the support functions

The support functions bind the process together, building on the work done at entity level. Managers of the support functions and centres of excellence are responsible for approving certain principles; they also prepare a summary report, and monitor transverse action plans.

Training and awareness programmes

Numerous training and awareness programmes form part of the campaign: discussion forums and feedback meetings, internal control workshops, committee meetings at support function level, and reporting to the Executive Committees. A co-ordinating committee for those responsible for internal control at entity level provides a forum for information-sharing across the Group's entities.

ACCOUNTING AND FINANCIAL INTERNAL CONTROL

The entities have specific resources in both accounting and financial control. Accounting teams may be centralised or decentralised, depending on the circumstances. Financial controllers – present at every level of the organisation – work closely with operational managers.

The financial control and accounting functions both report to the General Counsel. Shared resource centres are in place in the main territories where Bouygues Construction operates. These centres enable subsidiaries based in the same geographical territory to access shared accounting resources, helping to ensure that common policies and rules are strictly observed.

2. RISKS RELATING TO BOUYGUES CONSTRUCTION'S OPERATIONS AND ACTIVITIES

OPERATIONAL RISKS ON MAJOR PROJECTS

The complexity and size of the projects undertaken by Bouygues Construction may expose the Group to risk both in studies and design, and in the execution phase.

Such risks may originate from factors such as:

- errors in design, costings or methods;
- insolvency of partners (co-contractors, subcontractors, service-providers and/or suppliers);
- co-ordination and interface issues, especially on co-construction projects or works in occupied premises; and/or
- failure to manage tough contractual commitments.

If this type of risk materialises, it can lead to consequences such as (i) cost overruns due to project delays (such as the cost of additional resources or late delivery penalties); (ii) the need to deploy additional technical and human resources; (iii) the need to carry out unforeseen design and/or construction work; (iv) replacement of a partner that has failed; (v) claims and litigation; and (vi) damage to the company's image or reputation.

Bouygues Construction's organisational structure builds in strict selection, commitment, validation and control procedures, at the most appropriate level within the business; the bigger the project, the more centralised the process.

For all major projects, the commercial commitment validation procedure requires the preparation of a Project Executive Summary at the outset, to identify and quantify the main risks. Internal audits are regularly conducted on major projects to obtain assurance of adequate control over emerging risks.

Finally, Bouygues Construction entities can call upon highly qualified human resources in both technical fields (through skills hubs) and specialist support services.

RISKS ASSOCIATED WITH HIGH INTERNATIONAL EXPOSURE

Bouygues Construction generates more than 60% of its business outside France, operating in around 60 countries, and hence is exposed to risks arising from political or social instability in certain nation states or regions (diplomatic tensions between nation states, and/or economic and commercial tensions). Global instability has intensified since the Covid-19 crisis, coupled with the rise of protectionism.

Generally speaking, if such a risk materialises, it could result in Bouygues Construction:

- incurring extra costs to continue operations and/or maintain a presence in the region affected, due (for example) to tougher regulations, higher taxes and/or embargoes;
- incurring extra costs to withdraw from a region or country;
- forgoing certain contracts or markets.

The risks arising from Bouygues Construction's international exposure are limited by:

- the resources in place to prevent and mitigate such risks, including:
 - a rigorous selection procedure implemented by the Executive Committee for any country where Bouygues Construction entities do not yet have a presence, or where they have not recently carried on operations;
 - in some regions, a "nomadic" business model, with a temporary operation set up to execute a specific major project;
 - the use of protective contractual terms, and the implementation of legal, financial and insurance-based preventive measures;
 - requiring payment in stable currencies;
 - close monitoring of forecasts (made possible by the depth of our order backlog) so that we can anticipate adverse trends and reallocate our means of production to less affected markets or activities.
- reinforcing our operations in stable countries: Europe (e.g. France, Germany and Switzerland), North America (United States and Canada), and Australia.

RISKS ASSOCIATED WITH SUPPLY CHAIN DISRUPTION

Starting in 2021, and accentuated during 2022 by the war in Ukraine, we have seen sharp price rises for materials and energy, disruption to freight and international logistics, and longer manufacturing and delivery lead-times.

The increasing scarcity of some commodities has created supply issues, and may generate extra costs for our business.

For Bouygues Construction, supply chain risks are mitigated by:

- a centralised procurement function, with specialist buyers and strategic offices around the world to take us as close as possible to where we source our supplies;
- an increased role for our dedicated cross-disciplinary Trading & Logistics unit in under-pressure regions, especially in the UK where the fallout from Brexit is also a factor.

Our procurement function has activated action plans to reduce the risk of supply chain disruption, including:

- specialised focus on supplies and subcontracting;
- enlarged scope of operations via the central management team;
- digitisation, including applications such as Ivalua, plus marketplace and RPA software; and
- communication (economic briefing notes, and specific guidance on materials-related risks).

INDUSTRY TRENDS AND UBERISATION

Our ability to innovate and adapt to changes in markets, techniques and technologies is essential.

Failure to adapt and innovate can adversely affect our capacity to improve productivity and reduce production costs. It could also lead to lost opportunities, and to our withdrawal from certain markets.

This risk is limited at Bouygues Construction thanks to co-ordination between our R&D, Open Innovation, Tech Watch, Future-Proofing and Strategic Marketing units, which helps us:

- support R&D activities within our subsidiaries, and centralise cross-disciplinary issues;
- monitor developments in customer behaviour and innovation;
- identify and secure partnerships with start-ups that offer a good fit with our business; and
- promote in-house initiatives.

LEGAL, REGULATORY AND ETHICAL RISKS

Ethical and compliance breaches

Bouygues Construction is exposed to ethical and compliance risks due to non-compliance with Group standards, especially as regards:

- its relationships with public sector bodies, whether acting as principal or granting the permissions necessary for projects to go ahead;
- the potential for employees to be subject to illegal approaches by intermediaries, suppliers or local partners, potentially resulting in anti-competitive practices, conflicts of interest, or embargo violations;
- the number of players involved in projects, whether in the prospecting phase or during execution; and
- the extent of its geographical footprint.

Ethical and compliance breaches may lead to substantial financial penalties; denial of access to certain contracts, markets, sources of funding and/or insurance policies; reputational damage; internal disruption; and the imposition of restrictive monitoring regimes. Following a complete overhaul of our corruption risk mapping in 2021, exposure to corruption risk is addressed through specific monitoring and action plans, in line with recommendations issued by the French anti-corruption agency.

Our ethics and compliance policy has strong backing at the highest level of management, and is supported by our Executive Committee (our chief decision-making body), of which our Chief Ethics Officer is a member. Our Chief Ethics Officer is supported by the Compliance Department, in turn backed up by compliance reps within entity-level Legal Affairs departments and our Local Legal Desks. Our policy is built around the Bouygues group's Code of Ethics, the Anti-Corruption Code, and the four Bouygues group compliance programmes. Bouygues Construction also provides employees with a Practical Guide to Ethics and Compliance (fully updated in 2022) which includes our policies on gifts and hospitality, guidance on patronage and sponsorship, and the rule under which the use of commercial intermediaries is no longer allowed. Implementation of the policy is supported by online tools including gift and hospitality reporting (a new application went live at the end of 2022), compliance verification databases, and training tools developed in-house.

Employee training and awareness programs are provided through the new ByCompliant training module, and performance indicators are presented during annual compliance reviews at entity and Bouygues Construction level, as well as at meetings of the Bouygues Construction Ethics Committee.

NON-FINANCIAL RISKS

Erosion of skills base and loss of attractiveness as an employer

Bouygues Construction's activities are dependent on the competencies, know-how and expertise of its employees, especially for the delivery of construction projects.

So the risk is that Bouygues Construction may be unable to attract and retain the most suitable people in terms of their know-how and/or potential; to train and build the skills of its employees effectively; or to allocate resources appropriately.

If this risk were to materialise, it would:

- reduce the overall level of expertise within Bouygues Construction, potentially weakening its market position;
- make it difficult to plan the availability of essential resources, leading to internal disruption;
- impair the quality and lead-times of project design and/or execution, leading to cost overruns; and
- adversely affect the image and reputation of Bouygues Construction.

Preventive and corrective measures are applied; these relate to spotting skills and talents, management training and support, and promoting the attractiveness of the sector and of Bouygues as an employer with a new employee promise.

Risks associated with climate change and carbon reduction expectations (CSR)

For Bouygues Construction, responding to mounting expectations in terms of corporate social responsibility, environmental awareness, climate risks and reducing our carbon footprint represents a major challenge.

Failure to address this challenge could result in lost opportunities and reputational damage.

Bouygues Construction has set up specific organisational structures to meet the challenge and limit the associated risks, and is continuing to apply its "Responsible and Engaged" approach covering 12 issues: Health & Safety; Ethics; Human Rights; Exemplary Operations; Energy & Carbon; Diversity & Quality of Life at Work; Circular Economy; Biodiversity; Sourcing of Sustainable Resources; Employability & Local Rootedness; Openness to Society; and Community Spirit.

We have also set up "TopSite", an internal accreditation scheme for our work sites, which addresses five issues: Health & Safety; Environment; Employees; Society; and Quality/Customer Engagement.

During 2021, we rolled out our climate strategy, and are now monitoring performance against our 2030 targets. We have committed to cut our greenhouse gas emissions in the medium term, with target reductions of 40% in energy consumption (scopes 1 & 2), 30% per m² for indirect emissions associated with buildings (scope 3), and 20% for other indirect emissions (scope 3) over the 2021-2030 period.

This is being backed up by awareness, communication and training campaigns to secure buy-in from everyone throughout our business.

During 2022, we bolstered our sustainable development strategy with three priorities:

- combating climate change through a strategy to decarbonise our operations;
- building an engaged supply chain through responsible, sustainable partnerships; and
- creating social value, so that we can have a positive impact in our communities and territories.

INSURANCE – RISK COVERAGE

Bouygues Construction's policy on insurance cover focuses on optimising and ensuring the continuing validity of the policies contracted for the company and its subsidiaries; the aim is to protect against exceptionally large or numerous potential claims at a cost that does not impair the company's competitiveness.

This long-term approach to insurance cover requires partnerships with high-quality insurers with excellent financial solidity. To preserve these partnerships and prevent information being used to the detriment of Bouygues Construction, especially in legal disputes, the amount of premiums and the terms of cover are kept strictly confidential, especially in liability insurance.

In addition to insurance policies required by law, Bouygues Construction also takes out liability cover (including for cyber risk) against loss or injury to third parties for which Group companies may be liable. Because Group companies vary greatly in size and in the nature of their operations, cover is tailored to the risks incurred, but is generally in excess of €5 million per claim.

Permanent premises (like the headquarters building, branch offices, depots and workshops) are protected by comprehensive insurance policies that provide cover up to a contractual rebuild cost agreed with the insurers on a maximum probable loss basis.

Projects in progress are usually covered by contractors' comprehensive insurance policies that provide protection for property damage. The insured sum is generally the market value.

However, in some cases, the insured sum may be limited by the total capacity available in the world insurance market, in light of specific criteria such as geographical location, the type of project (e.g. tunnels), the risk covered (e.g. cyclones or earthquakes), or the nature of the cover (e.g. ten-year construction guarantees for major building projects).

For all these contracts, deductibles are set so as to optimise the overall cost to Bouygues Construction, based on the likelihood of claims and the premium reductions that can be obtained from insurers by increasing the deductible.

Finally, Bouygues Construction and its subsidiaries operate a prevent and protect policy, including the development of new measures to further reduce the incidence and financial effect of accidents and claims.

3. CREDIT AND/OR COUNTERPARTY RISK

COMMERCIAL CREDIT AND COUNTERPARTY RISK

The fact that our projects and operational units are structurally cash-positive is a fundamental principle underpinning the financial security of our operations. Cash flow and financial risk projections are prepared for major projects from the prospecting phase onwards, and are regularly updated.

The quality and financial soundness of sensitive customers, consortium members, partners, suppliers and subcontractors are closely analysed. Depending on the contractual and commercial context of a project, we may inter alia:

- require an upfront advance from the customer before works commence and deduct warranty retentions from subcontractor progress statements;
- require bank guarantees (e.g. to secure payment in the case of customers, or as performance bonds in the case of subcontractors);
- assign trade receivables without recourse;
- take out export risk insurance (covering against country risk and political risk);
- take out credit insurance.

The Bouygues Construction group is not exposed to any risk of dependency on a specific customer.

In the case of ad-hoc consortia, temporary allocations of cash between consortium members are covered by bank guarantees securing the return of the cash.

BANKING CREDIT AND COUNTERPARTY RISK

Any investment of funds with a third party requires the prior approval of the Treasury and Financing Department, in terms of both the choice of bank counterparty (based on an analysis of the bank's rating) and the type of instrument.

The main investment products used are:

- certificates of deposit and term deposits with a maturity of no more than three months with high-grade counterparties;
- term accounts and interest-bearing accounts with high-grade banks offering daily liquidity;
- pure money-market funds offering daily liquidity and a positive yield.

These investments are subject to review and monitoring on a monthly basis.

No losses arose during 2022 on any of the investment products used by the Group.

As of 31 December 2022, no single bank held more than 5% of the Group's available liquidity. Over 90% of investments are placed with counterparties rated investment grade or better (minimum: Standard & Poors BBB+).

LIQUIDITY RISK

Net surplus cash amounted to €3,641 million as of 31 December 2022, an increase of €411 million compared with the end of 2021.

The 2022 figure includes a positive impact of €115 million due to an IFRS 5 reclassification during the year. There were €329 million of undrawn confirmed short-term credit facilities as of 31 December 2022.

4. INTEREST RATE RISK

EXPOSURE TO INTEREST RATE RISK

Interest rate risk exposure arises on floating-rate debt recognised in the balance sheet, and is hedged by floating-rate investments. Bouygues Construction negotiates upfront payments with customers before starting work on a contract, and hence has a substantial net cash surplus which is invested in the short term in products that are sensitive to interest rate movements.

INTEREST RATE RISK HEDGING POLICY

The only instruments that can be used for interest rate risk hedging purposes are interest rate swaps, caps and collars. These instruments are used solely for hedging purposes, are contracted solely with high-grade French and foreign banks, and carry no liquidity risk in the event of reversal. Specific reports are prepared for those responsible for the management and supervision of the relevant Group companies describing the use of these instruments, the selection of counterparties with whom they are contracted, and more generally, the management of exposure to interest rate risk.

Bouygues Construction's policy is to hedge at Group level some or all of its financial assets and liabilities, where these are foreseeable and recurring. Given the Group's level of debt and capital expenditure needs, use of the financial instruments listed above is limited to hedging the company's risk exposures.

5. CURRENCY RISK

EXPOSURE TO CURRENCY RISK

Bouygues Construction has low exposure to currency risk in routine commercial transactions. Where possible, expenses relating to a contract are incurred in the same currency as that in which the contract is billed.

This applies to most projects executed outside France, on which local-currency expenses (sub-contracting and supplies) represent a much higher proportion than euro-denominated expenses. Bouygues Construction also pays particular attention to risks relating to assets denominated in non-convertible currencies, and to country risk generally.

CURRENCY RISK HEDGING POLICY

The only instruments that can be used for currency risk hedging purposes are forward currency purchases and sales, currency swaps and currency options. These instruments are used solely for hedging purposes, are contracted solely with high-grade French and foreign banks, and carry no liquidity risk in the event of reversal. Specific reports are prepared for those responsible for the management and supervision of the relevant Group companies describing the use of these instruments, the selection of counterparties with whom they are contracted, and more generally, the management of exposure to currency risk.

Bouygues Construction group policy is to hedge systematically all residual exposure to currency risk on commercial transactions relative to the functional currency of a project or entity. If the future cash flow is certain, the currency risk is hedged by buying or selling

currency forward, or by means of currency swaps. For some large contracts, options may be taken out for hedging purposes before the contract award has been confirmed. Equity investments in foreign companies are usually hedged by a liability of a similar amount in the same currency in the books of the entity that holds the investment.

6. RISK RELATING TO EQUITIES AND OTHER FINANCIAL INSTRUMENTS

Bouygues Construction has no exposure to equities risk.

Financial instruments may occasionally be contracted to hedge a commodities risk, provided that an adequate instrument is available on the financial markets. These instruments are used solely for hedging purposes and are contracted solely with high-grade banks.

V. STATEMENT ON NON-FINANCIAL PERFORMANCE

SOCIAL AND ENVIRONMENTAL IMPACT OF ACTIVITIES – SOCIETAL COMMITMENTS COLLECTIVE AGREEMENTS – WORKING CONDITIONS

In accordance with Articles L. 22-10-36 and L. 225-102-1 of the French Commercial Code, information relating to:

- the consideration given by the company to the social and environmental consequences of its activities, including the consequences for climate change of those activities and of the use made of the goods and services produced by the company;

- the company's societal commitments to support sustainable development and the circular economy, cut food waste, combat food poverty, respect animal welfare and responsible, fair and sustainable food, combat discrimination, and promote diversity and the interests of people with disabilities;
- collective agreements in effect within the company, and their impacts on the company's economic performance and on the working conditions of employees;
- actions taken to combat discrimination and promote diversity;
- actions taken to promote physical activities and sport; and
- actions taken to support people with disabilities;

is provided in the 2022 Bouygues Universal Registration Document, available at www.bouygues.com.

VI. VIGILANCE PLAN

In accordance with Article L. 225-102-4 of the French Commercial Code, information relating to:

- human rights and fundamental freedoms; and
- human health and safety, and the environment;

is provided in the 2022 Bouygues Universal Registration Document, available at www.bouygues.com.

VII. SIGNIFICANT EVENTS AFTER THE REPORTING PERIOD

An Ordinary General Meeting of Bouygues Construction shareholders held on an extraordinary basis on 4 January 2023:

- approved the proposal to allot to Bouygues Construction shareholders the Equans shares received as consideration for the contribution in kind of Bouygues Energies & Services and Kraftanlagen Energies & Services GmbH;
- resolved that the 55,454,156 Equans shares received by Bouygues Construction be allotted to its shareholders in proportion to their respective interests in the share capital, i.e. approximately 31.0116 Equans shares (55,454,156 / 1,788,177) per Bouygues Construction share, as follows:
 - Bouygues SA to receive 55,435,549 Equans shares, representing a distribution of €608,474,516.39; and
 - SFPG to receive 18,607 Equans shares, representing a distribution of €204,235.11.

VIII. OUTLOOK FOR 2023

Bouygues Construction has good visibility, with:

- **confirmed order intake for 2023 of €8 billion as of 31 December 2022, plus a medium-term order backlog (2 to 5 years) of €6.1 billion;**
- **a solid balance sheet, bolstered by net surplus cash of €3.6 billion; and**
- **the capacity to export its expertise abroad: with 57% of its sales generated outside France, Bouygues Construction has ambitions to extend its footprint to new high-potential developed markets.**

IX. REVIEW OF THE CONSOLIDATED AND PARENT COMPANY FINANCIAL STATEMENTS

1. CONSOLIDATED FINANCIAL STATEMENTS

A total of 432 companies are included in the scope of consolidation, 54% of which are located outside France, compared with 422 at the end of 2021.

These comprise:

- 264 controlled entities, accounted for using the full consolidation method;
- 125 entities meeting the definition of a joint operation, which are accounted for using the proportional consolidation method; and
- 43 entities meeting the definition of a joint venture or over which Bouygues Construction exercises significant influence, which are accounted for using the equity method.

Changes in the scope of consolidation during 2022 did not have a material impact on the consolidated financial statements, except for the following acquisitions:

- Floating Wind Solutions, acquired on 10 August 2022 for €15 million. The provisional goodwill recognised as of 31 December 2022 amounted to €15 million.
- Ingenica Ingénierie Industrielle, acquired on 16 November 2022 for €5 million. The provisional goodwill recognised as of 31 December 2022 amounted to €5 million.

The main significant event of the year was:

Acquisition of Equans by the Bouygues group:

On 12 May 2022, Bouygues signed the Equans Share Purchase Agreement with Engie.

On 19 July 2022, the European Commission approved the acquisition of Equans by Bouygues subject to compliance with the undertakings made by Bouygues.

On 4 October 2022, Bouygues SA completed the acquisition of Equans, a key milestone in its development. The final purchase price for 100% of the shares of Equans was €6.1 billion.

Equans has been consolidated in the Bouygues financial statements since the start of October 2022. The activities of the Energies & Services arm of Bouygues, previously part of Bouygues Construction, became part of Equans at the start of January 2023.

Impact on the presentation of the financial statements:

In the Bouygues Construction consolidated financial statements, the Energies & Services arm was classified in the "Held-for-sale assets and operations and discontinued operations" category in the year ended 31 December 2021, in accordance with IFRS 5. That classification was maintained in the consolidated financial statements for the year ended 31 December 2022, pending the effective transfer to Equans which took place in January 2023.

Consequently, the Energies & Services arm is presented in the financial statements as follows:

- Assets and liabilities are presented as a total amount in specific line items within the balance sheet; receivables and payables between the Energies & Services arm and other Group entities continue to be eliminated on consolidation.
- The net after-tax profit is presented in a specific line item within the income statement, which includes (i) the net after-tax profits generated by such operations until the date of their disposal and (ii) any after-tax gain arising on disposal.
- Cash flows are also presented in a specific line item within the cash flow statement, which includes (i) the cash generated by such operations until the date of their disposal and (ii) any cash proceeds (net of taxes) from the disposal.

ASSETS

In aggregate, property, plant and equipment (€494 million) and intangible assets (€12 million) are €57 million lower than at the end of 2021. The main factors in this year-on-year movement are:

- capital expenditure of €127 million during the year, comprising €71 million outside France (including €13 million on the Trunk Road T2 tunnelling project in Hong Kong and €11 million on Pawtucket project in the USA), and €56 million within France;
- depreciation and amortisation expense charged during the period (€168 million);
- disposals of property, plant and equipment and intangible assets (generating a cash inflow of €44 million); and
- the reclassification of the property, plant and equipment and intangible assets of the Energies & Services arm to held-for-sale assets and operations (reduction of €22 million in 2022).

Goodwill amounts to €298 million. This includes €15 million of provisional goodwill on the acquisition of Floating Wind Solutions, and a negative effect of €2 million from the impact of fluctuations in foreign exchange rates against the euro (because goodwill is recognised and tracked in the functional currency of the acquired entity).

Investments in joint ventures and associates, accounted for by the equity method, amount to €29 million (versus €26 million at the end of 2021). As of 31 December 2022, this line item included a negative effect of €6 million from an IFRS 5 reclassification, and mainly comprises the 50% equity interest in UBY (formerly Com'In) at €9 million, and the 33% stake in the Stade de France consortium at €8 million.

Other non-current financial assets (€202 million) comprise €37 million of investments in non-consolidated companies, plus €165 million of non-current loans and receivables, advances to non-consolidated companies, and deposits and caution money. That compares with €217 million at the end of 2021.

Deferred tax assets amount to €59 million, mainly comprising unrealised tax gains related to provisions for employee benefits and provisions temporarily non-deductible for tax purposes.

Current assets (excluding cash and cash equivalents) amount to €3,065 million as of 31 December 2022.

The net cash position (cash and cash equivalents, net of overdrafts and short-term bank borrowings) is €3,991 million, €125 million lower than at the end of 2021 (€4,116 million), after taking into account a reduction of €464 million due to an IFRS 5 reclassification during 2022.

LIABILITIES AND EQUITY

Total shareholders' equity, including non-controlling interests (i.e. minority interests), is €389 million higher than the end-2021 figure, at €1,360 million. The main factors in this year-on-year movement are:

- a €330 million capital increase subscribed by Bouygues SA;
- the €311 million of net profit attributable to the Group for the period;
- minus the dividend payout of €274 million to shareholders;
- plus €17 million of actuarial gains (and the associated deferred taxes) following an increase in the discount rate and salary inflation rate assumptions used for lump-sum retirement benefits and pension obligations.

Non-current debt is €338 million, €543 million lower than at the end of 2021, due mainly to repayments of borrowings contracted with Bouygues group cash pooling entities in connection with transactions preparatory to the transfer of the Energies & Services arm to Equans.

Provisions – which are a significant item in the Building & Civil Works sector – are split between non-current (€667 million) and current (€605 million), in accordance with international financial reporting standards.

Current taxes payable amount to €70 million, and comprise corporate income taxes payable by French and foreign subsidiaries in the short term.

Trade payables are €2,282 million at end 2022, compared with €2,133 million at end 2021, after taking account of a reduction of €23 million due to an IFRS 5 reclassification.

Customer contract liabilities amount to €1,900 million at 31 December 2022, versus €2,004 million a year earlier. This line item is presented to comply with the requirements of IFRS 15, and represents the sum total of advances/down-payments received and deferred income.

Other current liabilities amount to €1,438 million. This line item mainly comprises tax and employee-related liabilities.

INCOME STATEMENT

Sales for the year are €9,306 million, a 5% increase versus 2021.

Of this, 43% was generated in France, and 28% in the rest of Europe.

Current operating profit is €276 million (versus €234 million in 2021). After deducting income tax expense of €83 million, net profit attributable to the Group is €311 million.

2. PARENT COMPANY FINANCIAL STATEMENTS

COMMENTS

The decrease of €489 million in net non-current assets (€1,801 million at end 2022, versus €2,290 million at end 2021) is mainly due to:

- capital increases:
 - at BYUK, for €55 million;
 - at UBY (formerly COM'IN), for €10 million; and
- the repayment in full of the loans from BYES, for €561 million.

Shareholders' equity at end 2022 is €1,400 million, an increase of €623 million, after taking account of a capital increase of €330 million (of which €6 million was allocated to share capital and €324 million to share premium); the €274 million dividend payout; and the net profit for the year of €567 million.

Debt at end December 2022 is €401 million (versus €1,245 million a year earlier). This line item consists of cash borrowed from Bouygues group cash pooling entities to finance non-current assets.

Net debt at 31 December 2022 is €492 million, versus €1,591 million at end 2021, a year-on-year improvement of €1,099 million.

INDEBTEDNESS

Net surplus cash as of 31 December 2022 is €3,641 million, an increase of €411 million versus the end of 2021. The 2022 figure includes a positive impact of €115 million due to an IFRS 5 reclassification during the year. There were €329 million of undrawn confirmed short-term credit facilities as of 31 December 2022.

LOANS OF LESS THAN THREE YEARS MADE BY THE COMPANY ANCILLARY TO ITS PRINCIPAL BUSINESS (Article L. 511-6, 3bis para.1 and Articles R. 511-2-1-1 and R. 511-2-1-2 of the French Monetary and Financial Code)

Bouygues Construction did not make any loans of less than three years ancillary to its principal business in the last financial year.

SUBSIDIARIES AND AFFILIATES

As required by Articles L. 233-6 and L. 247-1 of the French Commercial Code, the description of the Bouygues Construction group's activities and results contained in this Financial Report includes the activities of the company's subsidiaries and of companies under its control.

A table showing information about holdings in subsidiaries and affiliates is appended to the company's balance sheet and reproduced on the following page.

BRANCHES – SECONDARY ESTABLISHMENTS

As required by Article L. 232-1 of the French Commercial Code, we inform you that the company has three secondary establishments in the form of shared resource centres, located at Rouen and St Herblain (accounting) and Lyon (payroll).

INFORMATION ABOUT SUPPLIER AND CUSTOMER PAYMENT TERMS

As required by Articles L. 441-4 and D. 441-4 of the French Commercial Code, information about payment terms is provided below:

- suppliers: invoices received and due for payment that remain unpaid at the end of the reporting period;
- customers: invoices issued and due for payment that remain unpaid at the end of the reporting period.

Year ending 31 December 2022

Note:

- the "Trade payables" line item (€43 million) also includes accrued expenses and unrepresented bills of exchange;
- the "Trade receivables" line item (€33 million) also includes unbilled receivables.

X. HUMAN RESOURCES UPDATE

As of 31 December 2022, Bouygues Construction had a consolidated headcount of 52,892 (including BYES Intec and Kraftanlagen), split as follows:

| | |
|---|---------------|
| • France | 21,920 |
| - Site workers | 5,000 |
| - Clerical, technical and supervisory | 6,696 |
| - Managerial | 10,224 |
| <i>Includes managerial staff on secondment outside France</i> | |
| • International | 30,972 |
| - Expatriate staff* | 426 |
| - Local staff | 30,546 |

* Only includes expatriates governed by French law.

The frequency rate of accidents requiring time off work in 2022 was 4.3.
The severity rate was 0.28.

XI. APPROPRIATION OF 2022 PROFITS

We propose that you approve the following appropriation of profits:

| | |
|--|--------------------|
| Net profit for the 2022 financial year | €566,768,048.42 |
| Transfer to the legal reserve | (€614,602.50) |
| Retained earnings brought forward | €347,361,203.64 |
| Allotment of Equans shares: | |
| Partial offset against retained earnings (EGM of 04/01/2023) | (€270,040,178.27)* |
| Giving distributable profits of | €643,474,471.29 |
| Distribution of a dividend of | €199,381,735.50 |
| Balance carried forward as retained earnings | €444,092,735.79 |

* The balance of €338,638,573.23 was allocated to share premium (EGM of 04/01/2023).

As required by law, dividends paid in respect of each of the last three financial years are disclosed below:

| Year | 2019 | 2020 | 2021 |
|-----------------------|------------------------|------------------------|------------------------|
| Number of shares | 1,706,230 | 1,706,230 | 1,706,230 |
| Dividend per share | €190.48 | €89.00 | €160.70 |
| Total dividend | €325,002,690.40 | €151,854,470.00 | €274,191,161.00 |

XII. ACQUISITIONS OF EQUITY INTERESTS AND CONTROL

1. ACQUISITIONS OF SIGNIFICANT EQUITY INTERESTS IN COMPANIES WITH THEIR REGISTERED OFFICE IN FRANCE

In accordance with Articles L. 233-6 and L. 247-1 of the French Commercial Code, we inform you that during the last financial year Bouygues Construction did not acquire any direct equity interest (in share capital or voting rights) representing more than 5%, 10%, 20%, 33.33% or 50% of the capital of companies with their registered office in French territory.

2. ACQUISITIONS OF CONTROL OF COMPANIES WITH THEIR REGISTERED OFFICE IN FRANCE

In accordance with Articles L. 233-6 and L. 247-1 of the French Commercial Code, we inform you that during the last financial year Bouygues Construction did not acquire direct or indirect control over any company with its registered office in French territory.

XIII. INFORMATION ABOUT THE SHARE CAPITAL

1. TRANSACTIONS ALTERING THE SHARE CAPITAL

The Extraordinary General Meeting of 26 September 2022 resolved to increase the company's share capital by a nominal amount of €6,146,025 by the issuance of 81,947 new shares with a par value of €75 each, thereby increasing the share capital from €127,967,250 to €134,113,275.

2. IDENTITY OF INDIVIDUALS OR ENTITIES OWNING MORE THAN ONE-TWENTIETH OF THE SHARE CAPITAL OR VOTING RIGHTS

In accordance with Article L. 233-13 of the French Commercial Code and in light of the information received pursuant to Article L. 233-12 of that Code, we inform you that as of 31 December 2022, 99.97% of the share capital of Bouygues Construction was held by Bouygues, a *Société Anonyme* with its registered office at 32, Avenue Hoche, 75008 Paris, France, registered in the Paris Register of Commerce and Companies as number 572 015 246.

3. INFORMATION ABOUT CONTROLLED ENTITIES AND OWN SHARES

As required by Article L. 233-13 of the French Commercial Code, we inform you that as of 31 December 2022 Bouygues Construction did not hold any of its own shares.

4. ASSIGNMENTS OF SHARES TO REGULARISE CROSS-SHAREHOLDINGS

Because Bouygues Construction has no cross-shareholdings with any other company, the requirement to regularise the situation by assignment of shares (as imposed by Article L. 233-39 of the French Commercial Code) does not apply.

Consequently, no assignments of shares to regularise cross-shareholdings were carried out in the year ended 31 December 2022.

5. SHARES BOUGHT AND SOLD IN CONNECTION WITH VOLUNTARY EMPLOYEE PROFIT-SHARING SCHEMES (ARTICLES L. 225-208, L. 225-209-2 AND L. 225-211 OF THE FRENCH COMMERCIAL CODE)

No shares were bought or sold in connection with voluntary employee profit-sharing schemes during the year ended 31 December 2022.

XIV. NON-DEDUCTIBLE EXPENSES

As required by Articles 223 *quater* and 223 *quinquies* of the French General Tax Code, we inform you that no expenses not deductible for tax purposes (as mentioned in Article 39.4 of that Code) were incurred during the year, and no overheads mentioned in Article 39.5 of that Code were added back for tax purposes.

XV. EMPLOYEE SHARE OWNERSHIP

As required by Article L. 225-102 of the French Commercial Code, we inform you that as of the end of the reporting period (i.e. 31 December 2022), the percentage interest in the company's share capital held by employees of the company itself (and of entities related to the company within the meaning of Article L. 225-180 of the French Commercial Code) was zero.

However, as required by Article L. 225-184 of the French Commercial Code, a special report is being presented to the Annual General Meeting on awards and exercises of stock options during the year relating to (i) corporate officers of the company and (ii) the ten company employees awarded the most options.

XVI. ECONOMIC AND SOCIAL COMMITTEE OBSERVATIONS

The Economic and Social Committee has made no observations pursuant to Article L. 2323-7-2 of the French Labour Code.

XVII. AUTHORISATION OF GUARANTEES

As required by Articles L. 225-35 and R. 225-28 of the French Commercial Code, we inform you that the Board of Directors, at its meeting of 10 November 2022, authorised the Chairman & Chief Executive Officer to enter into guarantees up to an overall cap of €300 million.

The authorisation was granted for a period of one year.

XVIII. RESOLUTIONS

The following resolutions relating to agenda items are submitted for your approval:

- Reading of the Management Report, the Board of Directors' report on corporate governance and the statutory auditors' reports.
- Approval of the parent company financial statements for the 2022 financial year.
- Approval of the consolidated financial statements for the 2022 financial year.
- Appropriation of profits for the 2022 financial year, and setting of the dividend.
- Approval of regulated agreements covered by Article L. 225-38 *et seq* of the French Commercial Code.
- Ratification of the co-opting of Marie-Luce Godinot as a director.
- Ratification of the appointment of Didier Casas as a non-voting director.
- Renewal of the term of office of Pascal Minault as a director.
- Renewal of the term of office of Olivier Roussat as a director.
- Renewal of the term of office of Charlotte Bouygues as a director.
- Renewal of the term of office of Marie-Luce Godinot as a director.
- Renewal of the term of office of Bouygues SA, represented by Pascal Grangé, as a director.
- Renewal of the term of office of Olivier Bouygues as a non-voting director.
- Renewal of the term of office of William Bouygues as a non-voting director.
- Renewal of the term of office of Didier Casas as a non-voting director.
- Powers for filing and formalities.

We invite you to cast your vote on the resolutions put to you.

XIX. OTHER INFORMATION

Corporate governance

As of 31 December 2022, the Company's executive management comprises a Chairman & Chief Executive Officer and a Deputy Chief Executive Officer.

We hereby inform you that

- the terms of office of Ernst & Young Audit as a statutory auditor and of Auditex as an alternate statutory auditor will expire at the close of the Annual General Meeting held to approve the financial statements for the year ended 31 December 2026; and
- the term of office of Mazars as a statutory auditor will expire at the close of the Annual General Meeting held to approve the financial statements for the year ended 31 December 2027.

NOTES TO THE FINANCIAL STATEMENTS

NOTE 1. SIGNIFICANT EVENTS OF 2022

1.1 SIGNIFICANT EVENTS AND CHANGES IN SCOPE OF CONSOLIDATION IN 2022

On 12 May 2022, Bouygues signed the Equans Share Purchase Agreement with Engie.

On 19 July 2022, the European Commission authorised the acquisition of Equans by Bouygues, subject to compliance with the undertakings made by Bouygues.

On 4 October 2022, Bouygues SA completed the acquisition of Equans, a key milestone in its development. The final purchase price for 100% of the shares of Equans was €6.1 billion.

Equans has been consolidated in the Bouygues financial statements since the start of October 2022. The activities of the Energies & Services business segment of Bouygues, which remained part of Bouygues Construction up to and including 31 December 2022, became part of Equans with effect from the start of January 2023.

In the Bouygues Construction financial statements, the Energies & Services business segment was classified in the "Held-for-sale assets and operations and discontinued operations" category in the year ended 31 December 2021, in accordance with IFRS 5. That classification was retained in the financial statements for the year ended 31 December 2022 (see Note 17) pending the effective transfer of Energies & Services to Equans in January 2023.

1.2. SIGNIFICANT EVENTS AND CHANGES IN SCOPE OF CONSOLIDATION SUBSEQUENT TO 31 DECEMBER 2022

On 4 January 2023, Bouygues Construction transferred to Equans all of its shares comprising the capital of its Energies & Services operations (i.e. the entities Bouygues Energies & Services and Kraftanlagen Energies & Services GmbH). All the Equans shares received by Bouygues Construction as consideration for the transfer were distributed immediately to Bouygues SA.

NOTE 2. GROUP ACCOUNTING POLICIES

2.1. BASIS OF PREPARATION OF THE FINANCIAL STATEMENTS

The consolidated financial statements of the Bouygues Construction group for the year ended 31 December 2022 were prepared in accordance with the standards issued by the IASB as endorsed by the European Union and applicable as of that date. Those standards (collectively referred to as "IFRS") comprise International Financial Reporting Standards (IFRSs), International Accounting Standards (IASs), and interpretations issued by the IFRS Interpretations Committee – previously the International Financial Reporting Interpretations Committee (IFRIC), itself the successor body to the Standing Interpretations Committee (SIC). The Group has not early adopted as of 31 December 2022 any standard or interpretation not endorsed by the European Union.

The financial statements are presented in millions of euros (unless otherwise indicated) and comprise the balance sheet, the income statement, the statement of recognised income and expense, the statement of changes in shareholders' equity, the cash flow statement, and the notes to the financial statements.

They include comparatives as of 31 December 2021. The balance sheet, statement of recognised income and expense and statement of changes in shareholders' equity as of that date have been restated to reflect the IFRS IC Agenda Decision on IAS 19, as described below; and the income statement and cash flow statement as of that date have been restated to reflect the application of IFRS 5.

The financial statements of the Bouygues Construction group include the financial statements of Bouygues Construction SA and its subsidiaries, its investments in associates and joint ventures, and its joint operations. They are presented in millions of euros, and take account of Recommendations 2013-03 (of 7 November 2013) and 2016-01 (of 2 December 2016), issued by the *Autorité des Normes Comptables* (ANC), the French national accounting standard-setter.

The consolidated financial statements were closed off by the Board of Directors on 16 February 2023, and will be submitted for approval by the forthcoming Annual General Meeting on 26 April 2023.

The consolidated financial statements for the year ended 31 December 2022 were prepared in accordance with IFRS using the historical cost convention, except for certain assets and liabilities measured at fair value where this is a requirement under IFRS.

Accounting policies specific to the consolidated financial statements are as follows:

EXERCISE OF JUDGEMENT AND USE OF ESTIMATES

In preparing consolidated financial statements to comply with IFRS standards and interpretations, the Group uses estimates and assumptions which may have affected the amounts reported for assets, liabilities and contingent liabilities at the end of the reporting period, and the amounts of income and expenses reported for the period.

These estimates and assumptions have been applied consistently on the basis of past experience and of various other factors regarded as reasonable forming the basis of assessments of the valuations of assets and liabilities for accounting purposes. Actual results may differ materially from these estimates if different assumptions or conditions apply.

The main items involved are the impairment testing of goodwill and equity investments; the measurement of identifiable assets and liabilities in a purchase price allocation; employee benefits (lump-sum retirement benefits, pensions, etc.); the fair value of unlisted financial instruments; the recoverability of deferred tax assets, especially where there is a history of tax losses over a number of years; provisions (for litigation and claims, etc.); leases (reasonable certainty of exercise of lease options and incremental borrowing rates, as described respectively in Notes 2.4.1.1. and 2.4.2.1 to the consolidated financial statements); end-of-contract margins on construction contracts (see Note 2.4.3.2 to the consolidated financial statements); and the high probability of loss of control over the assets and operations classified as held-for-sale within the 12 months following the end of the reporting period in accordance with IFRS 5.

Where no standard or interpretation applies to specific transactions, events or conditions, Group management exercises its judgement to define and apply accounting policies that will provide relevant information that gives a fair presentation and is comparable between periods, such that the consolidated financial statements:

- represent faithfully the financial position, financial performance and cash flows of the Group;
- reflect the economic substance of the underlying transactions; and
- are neutral, prudent, and complete in all material respects.

Disclosures about judgements made by management are provided in the notes to the consolidated financial statements.

HELD-FOR-SALE ASSETS AND OPERATIONS AND DISCONTINUED OPERATIONS

A non-current asset, or a group of directly-associated assets and liabilities, is regarded as being held for sale if its carrying amount will be recovered primarily through a sale rather than through continuing use. For this to be the case, the asset must be available for sale in its immediate condition, and its sale must be highly probable. Such held-for-sale assets or asset groups are measured at the lower of the carrying amount or the estimated selling price less costs to sell.

A discontinued operation is one that is material to the Group (having been treated as a Cash Generating Unit) and that has either been disposed of or classified as a held-for-sale asset. Discontinued operations are presented in the financial statements as follows:

- The assets and liabilities related to the held-for-sale operations are presented as a total amount in specific line items within the balance sheet; receivables and payables between those operations and other Group entities continue to be eliminated on consolidation. The comparative balance sheet is not restated.
- The net after-tax profit of discontinued operations is presented in a specific line item within the income statement, which includes (i) the net after-tax profits generated by such operations until the date of their disposal and (ii) any after-tax gain arising on the actual disposal. The prior-year income statement presented for comparative purposes is restated in the same way.
- Cash flows from discontinued operations are also presented in a specific line item within the cash flow statement, which includes (i) the cash generated by such operations until the date of their disposal and (ii) any cash proceeds (net of taxes) from the actual disposal. The prior-year cash flow statement presented for comparative purposes is restated in the same way.

2.2. NEW ACCOUNTING STANDARDS AND INTERPRETATIONS

The Bouygues Construction group applied the same standards, interpretations and accounting policies for the year ended 31 December 2022 as were applied in its consolidated financial statements for the year ended 31 December 2021, except for new IFRS requirements applicable from 1 January 2022 as mentioned below.

- Principal amendments effective within the European Union and mandatorily applicable in 2022:
 - **Amendments to IAS 37**
On 14 May 2020, the IASB issued amendments to IAS 37, relating to onerous contracts. The amendments clarify what costs an entity considers in determining the cost of fulfilling a contract, in order to assess whether that contract is onerous. The impact of the amendments on the Group is immaterial.

• Amendments to IAS 16

On 2 July 2021, the IASB issued amendments to IAS 16, relating to how entities account for the net proceeds generated by an item of property, plant and equipment while that item is being brought to the location and condition necessary for it to be operated. The amendments prohibit entities from deducting such proceeds from the cost of the item; rather, the proceeds generated by the sale and the corresponding costs must be recognised in profit or loss. The impact of the amendments on the Group is immaterial.

• IFRS IC agenda decision on IAS 38

In April 2021, the IASB approved the December 2020 agenda decision of the IFRS IC on accounting for the costs of configuring or customising application software in a Software as a Service (SaaS) arrangement. Depending on their nature, such costs are generally recognised as an expense, either immediately or over the term of the contract. An analysis of the agenda decision has been completed, and concluded that the impacts on the Group are immaterial. Opening shareholders' equity has not been restated. All costs of configuring or customising application software brought into service from 1 January 2022 onwards have been accounted for in accordance with the IFRS IC agenda decision.

- Principal amendments effective within the European Union and mandatorily applicable from 1 January 2023:

• Amendments to IAS 12

On 7 May 2021, the IASB issued amendments to IAS 12 on accounting for deferred taxation on the initial recognition of a single transaction that gives rise to deferred tax assets and liabilities of equal amounts. The amendments apply to transactions in which an entity recognises both an asset and a liability, such as when accounting for a lease or a decommissioning obligation, and were endorsed by the European Union on 11 August 2022.

An impact analysis is ongoing, and is due to be completed during the first quarter of 2023. At this stage, the impact on the Group would appear to be immaterial.

2.3. CONSOLIDATION METHODS

2.3.1. CONSOLIDATION METHODS AND SCOPE OF CONSOLIDATION

Companies over which Bouygues Construction exercises exclusive control are consolidated by the full consolidation method.

In the case of jointly controlled operations (which give each party direct rights over the assets and obligations for the liabilities), the income, expenses, assets and liabilities of the joint operation are accounted for in accordance with the interests held in the joint operation.

Companies over which Bouygues Construction exercises significant influence, and joint ventures (which give the parties rights over the net assets), are accounted for using the equity method.

- Changes in scope of consolidation

| Financial year | 31/12/2022 | 31/12/2021 |
|-----------------------------------|------------|------------|
| Companies controlled by the Group | 264 | 267 |
| Joint operations | 125 | 120 |
| Joint ventures and associates | 43 | 35 |
| Total | 432 | 422 |

2.3.2. TRANSLATION OF THE FINANCIAL STATEMENTS OF FOREIGN ENTITIES

The financial statements of consolidated subsidiaries with a functional currency other than the euro are translated at the exchange rate prevailing at the end of the reporting period (in the case of the balance sheet) and at the average exchange rate for the year (in the case of the income statement and cash flow statement). The resulting translation differences are taken to equity under "Translation reserve".

Translation differences arising on foreign-currency liabilities accounted for as hedges of a net investment in a foreign operation are recognised in equity.

2.3.3. TRANSLATION OF TRANSACTIONS DENOMINATED IN FOREIGN CURRENCIES

Transactions denominated in foreign currencies are translated into euros at the average exchange rate on the date of the transaction. Monetary assets and liabilities denominated in foreign currencies at the end of the reporting period are translated at the closing exchange rate. Translation differences are recognised in profit or loss for the period. Non-monetary assets and liabilities denominated in foreign currencies and accounted for at historical cost are translated using the exchange rate on the date of the transaction.

2.3.4. DEFERRED TAXATION

Deferred taxation is recognised on all differences between the carrying amount and the tax base of assets or liabilities (balance sheet liability method). These differences arise from:

- temporary differences between the carrying amount and tax base of assets or liabilities, which may be:
 - items generating a tax liability in the future (deferred tax liabilities), arising mainly from income that is liable to tax in future periods;
 - items deductible from taxable profits in the future (deferred tax assets), mainly provisions that are temporarily non-deductible for tax purposes. Deferred tax assets are reviewed at the end of each reporting period, and recognised where it is probable there will be sufficient taxable profits to enable the temporary differences to be offset.
- tax losses available for carry-forward (deferred tax assets), provided that there is a strong probability of recovery in future periods.

Deferred taxes are measured using national tax rates that are expected to apply to the period when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted in the relevant country by the end of the reporting period. As of 31 December 2022, the temporary differences and tax losses available for carry-forward of French entities were measured at the enacted rate of 25.83%.

Deferred taxes are not discounted, and are reported in non-current assets and liabilities.

2.3.5. CONCESSION CONTRACTS AND PUBLIC-PRIVATE PARTNERSHIPS (PPP)

The Bouygues Construction group has equity interests in associates that have been awarded concession/PPP contracts; these are accounted for in accordance with IFRIC 12.

2.4. ACCOUNTING POLICIES AND VALUATION METHODS

2.4.1. ASSETS

2.4.1.1. Non-current assets

PROPERTY, PLANT AND EQUIPMENT

Property, plant and equipment is initially measured at acquisition cost.

Where an item of property, plant and equipment consists of significant components with different useful lives or different depreciation methods, each component is accounted for as a separate item of property, plant and equipment (component-based approach).

The cost of an item of property, plant and equipment comprises the purchase price after deducting any commercial discounts and rebates, and including import duties and non-refundable taxes and any costs directly attributable to bringing the asset to the condition necessary for it to be capable of operating as intended by management.

Subsequent costs are recognised as an expense unless they improve the performance of the asset as originally specified, extend its useful life, or reduce the cost of operating the asset as previously established.

Following initial recognition as an asset, items of property, plant and equipment are carried at cost less accumulated depreciation and impairment. The Bouygues Construction group accounts for property, plant and equipment using the historical cost model.

Depreciation is calculated over the expected useful life of the asset. The useful life of an asset is the period over which the Group expects the asset to be available for use.

The depreciable amount of an asset is cost less any estimated residual value net of costs of disposal. The residual value of an item of property, plant and equipment is the amount the Group would receive currently for the asset if the asset were already of the age and in the condition expected at the end of its useful life (excluding the effects of inflation).

The principal useful lives applied are:

- buildings: 10 to 40 years;
- plant, equipment and tooling: 3 to 15 years;
- other property, plant and equipment: 3 to 10 years, depending on the type of asset (vehicles, office equipment and furniture, etc).

Depreciation periods are reviewed annually, and may be adjusted if expectations differ from previous estimates. Any such changes in estimates are accounted for prospectively.

Gains and losses on disposal represent the difference between the sale proceeds and the carrying amount, and are recognised in the income statement under "Other income from operations" unless they meet the criteria for classification within "Other operating income and expenses".

RIGHT OF USE OF LEASED ASSETS

IFRS 16 defines the right of use under a lease as an asset that represents a lessee's right to use an underlying asset for the lease term.

This right of use is recognised by the Bouygues group on the commencement date of the lease (the date on which the asset is made available). It is measured at cost, which includes:

- the initial amount of the lease obligation (see Note 3.2.2 to the consolidated financial statements);
- lease payments made in advance to the lessor, less any lease incentives received from the lessor;
- material initial direct costs incurred by the lessee to obtain the lease, i.e. costs that would not have been incurred if the lease had not been obtained;
- an estimate of the costs of dismantling the leased asset, or restoring it to the condition required by the terms of the lease.

The right of use asset is amortised on a straight line basis over the lease term. It is written down by means of an impairment allowance if there is an indication that it may have become impaired.

The lease term is the non-cancellable period for which the lessee has the right to use the underlying asset, including any extension or termination options the lessee is reasonably certain to exercise.

Where the Group enters into a sale-and-leaseback transaction, under which an asset is sold to a third party within the meaning of IFRS 15 and then taken back by the Group as lessee, the right of use asset is determined based on the proportion of the previous carrying amount of the transferred asset, and represents the right of use retained by the Group. That proportion is determined by reference to the ratio of the lease obligations to the selling price of the asset. Similarly, any gain or loss on disposal is only recognised to the extent of the rights effectively transferred to the acquirer/lessor.

Within the Bouygues Construction group, rights of use relate mainly to property leases, which generally have a lease term of nine years in France.

INTANGIBLE ASSETS

IAS 38 defines an intangible asset as an identifiable non-monetary asset without physical substance which is controlled by the entity. An asset is identifiable:

- if it is separable, i.e. capable of being independently sold, transferred, licensed, rented or exchanged;
- or if it is derived from contractual or other legal rights, whether separable or not.

Intangible assets with finite useful lives are depreciable. Intangible assets with indefinite useful lives are not depreciable, but are tested for impairment annually.

Development expenses are capitalised if the IAS 38 criteria are met, i.e. if they are expected to generate future economic benefits and their cost can be reliably measured.

Incorporation and research expenses are expensed as incurred.

BUSINESS COMBINATIONS

With effect from 1 January 2010, business combinations have been accounted for in accordance with the revised IFRS 3 and IAS 27, which use the concept of "obtaining control" in determining the accounting treatment to be applied to acquisitions or disposals of equity interests; depending on the circumstances, the impacts of such acquisitions and disposals are recognised either in consolidated profit or loss or in equity.

In a business combination, the fair value of the consideration transferred is allocated to the identifiable assets and liabilities of the acquiree, which are measured at fair value at the acquisition date and presented in the balance sheet using the full fair value method in accordance with the revised IFRS 3. This method involves remeasuring the assets and liabilities acquired at fair value in full (including non-controlling interests), rather than remeasuring just the percentage interest acquired.

The revised IFRS 3 allows entities to elect one of two methods of accounting for non-controlling interests in each business combination:

- at fair value (full goodwill method), i.e. the non-controlling interests are allocated their share of goodwill;
- at the non-controlling interests' proportionate share of the fair value of the acquired entity's identifiable assets and liabilities (partial goodwill method), i.e. no share of goodwill is allocated to the non-controlling interests.

Goodwill recognised prior to 1 January 2004 continues to be measured using the partial goodwill method. This method involves restricting the fair value remeasurement of identifiable items to the percentage interest acquired. Non-controlling interests in these items are measured on the basis of the carrying amount of the items as shown in the balance sheet of the acquired entity. The revised standards allow the acquirer to elect to account for each new business combination on either a full goodwill basis or a partial goodwill basis.

Fair value is the price that would be received for an asset or paid to settle a liability in an arm's length transaction between market participants at the date of measurement.

Goodwill is the excess of the acquisition cost over the acquirer's interest in the fair value of the acquiree's identifiable assets, liabilities and contingent liabilities that can be reliably measured at the acquisition date.

It represents the payment made by the acquirer in anticipation of the future economic benefits arising from assets that cannot be individually identified and separately recognised, and is reported separately as an asset in the balance sheet.

If the cost of a business combination is less than the acquirer's interest in the fair value of the acquiree's identifiable assets, liabilities and contingent liabilities, then the difference is referred to as "negative goodwill" or "gain on a bargain purchase" and is recognised in profit or loss in the period in which the combination occurred.

The purchase price allocation period is limited to the time required to identify and measure the acquired entity's assets and liabilities, the non-controlling interests, the consideration transferred and the fair value of any previously-held equity interest, subject to a maximum period of 12 months.

Amortisation of intangible assets recognised in a purchase price allocation is charged against current operating profit.

Subsequent to initial recognition, goodwill is measured at cost less accumulated impairment losses in accordance with IAS 36, and is tested for impairment annually. Impairment losses are charged to the income statement as an operating item.

Goodwill is allocated to the cash generating unit (CGU) benefiting from the business combination or to the group of CGUs at the level of which return on investment is measured.

The value in use of CGUs is determined using the discounted cash flow (DCF) method, applying the following principles:

- The discount rate is determined by reference to the weighted average cost of capital.
- The cash flows used are derived from the medium-term business plan prepared by the management of the CGU.
- The terminal value is calculated by aggregating the discounted cash flows to infinity, based on normative cash flows (after lease expenses) and a perpetual growth rate that is consistent with the growth potential of the markets in which the CGU operates and with its competitive position in those markets.

The recoverable amount of the assets of the CGU as determined above is then compared with their carrying amount in the consolidated balance sheet, after including right of use assets and deducting lease obligations.

Bouygues Construction has identified two CGUs: one comprising French and international Building & Civil Works activities, and the other comprising French and international Energies & Services activities.

The business plan used was prepared within the context of the Group's management cycle.

The assumptions applied include no changes in the scope of the Group's Building & Civil Works and Energies & Services activities, and the continuation of those activities as a going concern over the three-year period covered by the business plan.

The Bouygues Construction group has set a year by year profitability target for its Building & Civil Works and Energies & Services activities.

This target is incorporated into the assumptions used in the business plan, which also takes into account past experience and external sources of information.

Building & Civil Works CGU:

- Discount rate applied: 7.10%/6.70%, depending on the assumptions used.
- Growth rate applied: 2%.

Energies & Services CGU:

- Discount rate applied: 8.5%/10%, depending on the assumptions used.
- Growth rate applied: 1%.

Because of the acquisition of Equans by Bouygues and the transfer of the Energies & Services business segment to Equans in January 2023, the impairment tests conducted on Energies & Services applied the valuations carried out in connection with that reorganisation.

NON-CURRENT FINANCIAL ASSETS

The accounting treatment of financial assets depends on the management model and the characteristics of the contractual cash flows. Based on those criteria, they are accounted for in one of three ways:

- at amortised cost;
 - at fair value through other comprehensive income; or
 - at fair value through profit or loss.
- **Investments in non-consolidated companies and other long-term investment securities**
Equity instruments (other than investments in consolidated companies) are accounted for at fair value. Changes in fair value are recognised either (i) through profit or loss, in "Other financial income" or "Other financial expenses", or (ii) through equity, in "Other comprehensive income not reclassifiable through profit or loss"; the choice between those two methods is made on initial recognition for each instrument individually, and cannot be subsequently changed.
 - **Loans and receivables**
Loans and receivables are accounted for at amortised cost. In accordance with IFRS 9, an impairment allowance is booked on initial recognition to reflect the expected risk of loss during the next twelve months, and charged to profit or loss.

2.4.1.2. Current assets

INVENTORIES

Inventories are stated at the lower of cost or market price.

Where the realisable value of inventory is lower than cost, an impairment loss is recognised.

TRADE AND OTHER DEBTORS

Trade receivables are carried at face value, net of impairment recorded to reflect the probability of recovery. These receivables are usually short-term and non interest-bearing. They are measured at the original invoice amount, unless application of an implied interest rate would have a material effect.

For contracts accounted for using the percentage of completion method, trade receivables include invoices and statements issued as works are executed or services provided, and accepted by the project owner.

CUSTOMER CONTRACT ASSETS

Customer contract assets (see Note 4.4) represent a contingent right for the Group to receive consideration in exchange for goods or services already transferred to a customer, when that right is conditional on something other than the passage of time. They comprise sales recognised on a percentage of completion basis where billing is contingent on the supply of other goods and services and/or on the attainment of contractually agreed milestones.

CASH AND CASH EQUIVALENTS

Cash equivalents (short-term investments) are measured at fair value and classified as available-for-sale financial assets.

Cash and short-term deposits, and bank overdrafts: because of their short-term nature, the carrying amounts shown in the consolidated financial statements are a reasonable approximation of their market value.

2.4.2. LIABILITIES

2.4.2.1. Non-current liabilities

NON-CURRENT DEBT

With the exception of derivative instruments accounted for as liabilities measured at fair value (including a counterparty risk component, which is immaterial), all other borrowings and financial liabilities are accounted for at amortised cost using the effective interest method.

The portion of long-term debt due within less than one year is included in current liabilities.

NON-CURRENT LEASE OBLIGATIONS

In accordance with IFRS 16, on commencement of a lease the lessee recognises a lease obligation in the balance sheet, equivalent to the present value of the lease payments over the lease term.

The following amounts are included in the lease payments used to measure the obligation:

- fixed payments (including in-substance fixed payments, i.e. payments that may in form contain variability, but in substance are unavoidable);
- variable lease payments that depend on an index or a rate at the commencement date of the lease;
- payments due by the lessee under residual value guarantees;
- the exercise price of a purchase option, if that option is reasonably certain to be exercised;
- payments of penalties for terminating or not extending the lease.

During the term of the lease, the carrying amount of the lease obligation is:

- increased to reflect interest on the lease obligation, which is recognised as an expense in the income statement and calculated using the discount rate used on initial measurement; and
- reduced to reflect lease payments made.

The discount rate used to calculate the lease obligation is determined for each asset on the basis of the incremental borrowing rate at the inception date of the lease. That rate is obtained by aggregating a market rate that reflects the currency and term of the lease, and a sector-specific spread that reflects the nature of the lease.

The Group has elected to apply the practical expedients permitted by IFRS 16 to exclude leases where the as-new value of the underlying asset is less than €5,000, and assets where the lease term is reasonably certain to be less than 12 months. Such leases are recognised in profit or loss as and when lease payments are made. The Group has also elected to account for each lease component separately, distinguishing the lease components from the non-lease (service) components.

As permitted by IFRS 16, Bouygues has not elected to apply the standard to leases of intangible assets.

The portion of long-term lease obligations due within less than one year is included in current liabilities.

NON-CURRENT PROVISIONS

A provision is recorded where the Group has a present obligation to a third party at the end of the reporting period resulting from a past event, the settlement of which is expected to result in a probable outflow from the Group of resources embodying economic benefits that can be measured reliably.

These mainly comprise:

- **Employee benefits**
- **Provisions for lump-sum retirement benefit obligations:**

The Group records a provision for its obligations to pay lump-sum benefits to its employees on retirement, to the extent that those obligations are not covered by insurance policies.

These provisions are calculated using the projected unit credit method based on final salary, and on the basis of the collective agreement for each business segment. Benefit entitlement is recognised on a straight line basis only over the final years of service over which an employee's capped benefit rights accrue.

The amount of the provision is determined on the basis of the relevant collective agreement, and taking account of the following factors:

- employees classified in groups with similar characteristics in terms of grade, age and length of service;
- monthly salary, uplifted by a coefficient to reflect the applicable percentage of employer's social security charges;
- final salary inflation rate;
- discount rate applied to the obligation over the projected period to the retirement date;
- employee turnover rate, determined by age bracket and socio-professional category;
- life expectancy, determined using the INSEE 2012–2014 mortality table.

In accordance with the revised IAS 19, all actuarial gains and losses on defined-benefit post-employment benefit plans are recognised in non-current provisions, with the matching entry recognised in equity via the statement of recognised income and expense.

- **Provision for long-service awards:**

The Group records a provision for its obligations in respect of long-service awards (10, 20, 30 and 40 years) using the projected unit credit method, projected over the period to the date of the award.

- **Pension provisions (defined-benefit plans):**

The Group calculates and recognises defined-benefit obligations (see Note 20) in accordance with the revised IAS 19.

The actuarial assumptions used to measure the present value of the pension obligation and the service cost for the period in respect of defined-benefit plans represent the best estimate of the variables that will determine the final cost of the benefits. These assumptions are internally consistent. The discount rate and the rate of return on plan assets are determined by reference to the expected market rate, taking into account the estimated timing of benefit payments; the discount rate applied to the obligation is determined by reference to the market rate for high-quality corporate bonds at the end of the reporting period.

- **Provisions for litigation, claims and foreseeable risk exposures**

- **Customer warranty provisions**

These provisions are intended to cover risks for which the company is liable during the warranty period (essentially the ten-year warranty in France). Provisions established to cover the uninsured portion of risks under two-year and ten-year construction contract guarantees. These provisions are recognised in line with recognition of contract revenues, based on statistical data reflecting actual experience over the long term.

- **Site rehabilitation costs:**

Rehabilitation costs arising from the gradual deterioration of a site are covered by provisions recognised on the liabilities side of the balance sheet.

2.4.2.2. Current liabilities

TRADE AND OTHER CREDITORS

Because of the short-term nature of these liabilities, the carrying amounts shown in the consolidated financial statements are a reasonable estimate of market value.

CURRENT PROVISIONS

Current provisions, which relate to the normal operating cycle, mainly comprise:

- provisions for project risks and project completion;
- provisions for expected losses to completion on customer contracts. These relate to construction contracts in progress, and take account of claims accepted by the customer. They are measured on a contract by contract basis, with no netting between them.

CUSTOMER CONTRACT LIABILITIES

Customer contract liabilities represent the Group's obligation to transfer goods and services for which payment has already been received from a customer, or where the Group has an unconditional right to receive payment. They include advances and down-payments received on orders, and differences arising from the percentage of completion on a contract (see Note 11.1 to the consolidated financial statements).

2.4.3. INCOME STATEMENT

2.4.3.1. Consolidated sales

Consolidated sales represent the aggregate amount of contract revenues, sales of products and sales of services where control of the asset produced has transferred to the customer, including sales generated by entities controlled by Bouygues Construction and by joint operations (after eliminating intercompany transactions).

The Group recognises revenue when:

- a customer contract, and the performance obligations within that contract, have been identified;
- a transaction price has been determined, and allocated between the performance obligations;
- the distinct performance obligations under the contract have been satisfied;
- it is probable that the future economic benefits of the transaction will flow to the Group;
- the amount of revenue can be reliably measured;
- at the transaction date, it is probable that the amount of the sale will be recovered.

Most contracts entered into by the Group contain a single performance obligation.

2.4.3.2. Accounting for construction contracts

Revenue from construction activities corresponds to the latest estimate of the total selling price, and takes account of claims that have been accepted by the customer or are highly probable.

Such revenue is recognised at the end of each reporting period by the percentage of completion method, using a completion rate determined by reference to progress of the works (output method) or to the cost of completed works (input method).

As soon as a loss on a contract is known and can be reliably measured, it is covered by a provision for expected losses to completion within "Current provisions" in the balance sheet. The loss is provided for in full, irrespective of the completion rate.

2.4.3.3. Profits/losses from joint operations

These represent the Group's share of profits or losses from non-consolidated partnerships and non-consolidated joint ventures; as such, they are a component of operating profit and are reported on the lines "Other income from operations" and "Other expenses on operations".

2.4.3.4. Operating profit

Operating profit represents the net amount of all income and expenses not generated by financing activities, by associates or by discontinued or held-for-sale operations, and excluding income taxes.

Any impairment of goodwill is recognised as a charge against operating profit.

2.4.3.5. Other operating income and expenses

These line items contain a very limited number of income and expense items, which are unusual and occur infrequently but are of particularly large amounts. The Group reports these items separately in its income statement to give users of the financial statements a better understanding of ongoing operational performance.

2.4.3.6. Income from net surplus cash

Income from net surplus cash comprises all gains, losses, income and expenses generated by components of net surplus cash during the period (see Note 9.1, "Main components of change in net surplus cash"), including gains and losses on related interest rate and currency hedges.

2.4.3.7. Other financial income and expenses

This comprises financial income and expenses that are of a non-operating nature and do not relate to components of "Income from net surplus cash".

2.4.4. FINANCIAL INSTRUMENTS

Some Group entities use financial instruments to limit the impact on the income statement of fluctuations in exchange rates and interest rates. The Group's policy on the use of financial instruments is described below.

The only instruments used for that purpose are:

- forward currency purchases and sales, currency swaps and currency options for currency risk hedging purposes;
- interest rate swaps and purchases of caps and collars for interest rate risk hedging purposes;
- commodity swaps and options for commodity risk hedging purposes.

These instruments have the following characteristics:

- they are used solely for hedging purposes;
- they are contracted solely with high-quality French and foreign banks;
- they carry no liquidity risk in the event of reversal.

Specific reports are prepared on a regular basis for those responsible for the management and supervision of the relevant Group companies, describing the use of hedging instruments; the selection of counterparties with whom they are contracted; and more generally, the management of exposure to currency risk and interest rate risk.

- **Financial risks to which the Group is exposed, and principles applied to the management of those risks**

FOREIGN EXCHANGE RISK

In general, the Bouygues Construction group has little exposure to currency risk in routine commercial transactions. Where possible, expenses relating to a contract are incurred in the same currency as that in which the contract is billed. This applies to most projects executed outside France, on which local-currency expenses (sub-contracting and supplies) represent a much higher proportion than euro-denominated expenses. The Bouygues group also pays particular attention to risks relating to assets denominated in non-convertible currencies, and to country risk generally.

Group policy is to hedge systematically all residual exposure to currency risk on commercial transactions relative to the functional currency of a project or entity. If the future cash flow is certain, the currency risk is hedged by buying or selling currency forward, or by means of currency swaps. For some large contracts, options may be taken out for hedging purposes before the contract award has been confirmed.

Equity investments in foreign companies are usually hedged by a liability of a similar amount in the same currency in the books of the entity that holds the investment.

INTEREST RATE RISK

Interest rate risk exposure arises on floating-rate debt recognised in the balance sheet, and is hedged by floating-rate investments.

The Group's income statement could be adversely affected by a significant fall in European interest rates. Interest rate swaps may be contracted to lock in the income streams from the Group's surplus cash.

• **Hedge accounting policies and rules**

In general, the financial instruments used by the Group qualify for hedge accounting, which means that the hedging relationship is documented in accordance with the requirements of IFRS 9.

Hedge accounting is applied where a derivative instrument wholly or partly offsets changes in the fair value or cash flows of a hedged item. If a hedging relationship cannot be demonstrated, all changes in fair value are recognised in profit or loss.

All derivative instruments are measured at fair value. Fair value is the quoted market price in the case of listed instruments, or is determined using calculation and valuation models based on market data (yield curves, exchange rates, etc) in other cases.

As required by IFRS 9, the fair value measurement of derivative financial instruments takes account of credit risk (for derivative assets) and of own credit risk (for derivative liabilities). Those components have no material impact on the Bouygues group consolidated financial statements.

CASH FLOW HEDGES

A cash flow hedge is a hedge of the exposure to variability in the future cash flows from a hedged item or a future transaction.

Where a derivative instrument is used to hedge the exposure to variability in the cash flows from a firm commitment or a forecast transaction, the change in the fair value of the portion of the hedging instrument that is determined to be an effective hedge is recognised directly in equity.

The change in fair value of the portion of the hedge regarded as ineffective is recognised immediately in profit or loss.

FAIR VALUE HEDGES

The purpose of a fair value hedge is to limit the variability of the fair value of an asset or a liability recognised in the balance sheet.

Where a derivative instrument hedges exposure to changes in the fair value of a receivable or a payable, the change in the fair value of the hedging instrument is recognised immediately in profit or loss. The gain or loss on the hedged item attributable to the hedged risk is accounted for as an adjustment to the carrying amount of the hedged item, and is recognised directly in profit or loss.

The fair value of hedged items corresponds to their carrying amount translated into euros using the rate prevailing at the end of the reporting period.

HEDGE OF A NET INVESTMENT IN A FOREIGN OPERATION

A hedge of a net investment in a foreign operation is a hedge of the currency risk exposure on the parent company's interest in the net assets of that operation.

Where a liability denominated in a foreign currency is used to hedge a net investment in a foreign operation, translation differences arising between that currency and the euro are recognised directly in equity. If the hedging instrument is a derivative instrument, the change in the fair value of the portion of the hedging instrument that is determined to be an effective hedge is recognised directly in equity; the change in fair value of the ineffective portion is recognised immediately in profit or loss.

2.4.5. CASH FLOW STATEMENT

The consolidated cash flow statement is presented in accordance with the amended IAS 7 and with ANC Recommendations 2013-03 of 7 November 2013 (using the indirect method) and 2016-01 of 2 December 2016.

Consolidated net profit is adjusted to eliminate the impact of transactions with no cash effect, and of income and expenses related to investing or financing activities.

The cash flow statement explains changes in the Group's net cash position, which is defined as the net total of the following balance sheet items:

- cash and cash equivalents; and
- overdrafts and short-term bank borrowings.

2.4.6. OFF BALANCE SHEET COMMITMENTS

A summary of off balance sheet commitments is provided in Note 19.

2.4.7. EBITDA AFTER LEASES

"EBITDA after Leases" equates to current operating profit after taking account of interest expense on lease obligations, before (i) net charges for depreciation and amortisation of property, plant and equipment and intangible assets, (ii) net charges to provisions and impairment losses, and (iii) effects of losses of control (relating to the impact of remeasuring retained interests).

"Other income from operations" and "Other expenses from operations", which are a component of current operating profit, mainly comprise:

- reversals of unutilised provisions and impairment;
- net foreign exchange differences on commercial transactions;
- gains and losses on disposals of non-current assets;
- profits and losses from joint operations, representing the Group's share of profits or losses from translucent companies such as Sociétés en Participation (SEPs).

2.4.8. NET DEBT/NET SURPLUS CASH

Net debt (or net surplus cash) is obtained by aggregating the following items:

- cash and cash equivalents;
- overdrafts and short-term bank borrowings;
- non-current and current debt;
- financial instruments (used to hedge financial liabilities measured at fair value).

Net debt/net surplus cash does not include non-current and current lease obligations.

A positive figure represents net surplus cash and a negative figure represents net debt.

2.4.9. FREE CASH FLOW

Free cash flow is defined as net cash flow (determined after (i) cost of net debt, (ii) interest expense on lease obligations and (iii) income taxes paid), minus net capital expenditure and repayments of lease obligations.

It is calculated before changes in working capital requirements related to operating activities.

2.4.10. CHANGES IN WORKING CAPITAL REQUIREMENTS RELATED TO OPERATING ACTIVITIES

"Changes in working capital requirements related to operating activities" as presented in the cash flow statement is obtained by aggregating movements in the following items:

- inventories and work in progress;
- advances and down-payments made on orders;
- trade receivables;
- customer contract assets;
- trade payables;
- customer contract liabilities;
- current provisions;
- other current asset and liability items, excluding (i) income taxes; (ii) net cash and cash equivalents and current debt; (iii) hedging instruments; (iv) current lease obligations; and (v) receivables/liabilities related to property, plant and equipment and intangible assets.

2.5. OTHER INFORMATION

Under the revised IAS 1, "Presentation of Financial Statements", the Group has elected to present the components of comprehensive income in two detailed statements, as permitted by the IASB:

- a) an income statement;
- b) a statement of recognised income and expense that reports other comprehensive income, including income and expenses recognised directly in equity.

Bouygues Construction is included in the scope of consolidation of Bouygues SA for the purposes of the presentation of the Bouygues SA consolidated financial statements.

NOTE 3. NON-CURRENT ASSETS

3.1. ACQUISITIONS OF NON-CURRENT ASSETS DURING THE YEAR, NET OF DISPOSALS

| | 2022 | 2021 |
|---|------------------------|------------|
| Acquisitions of property, plant & equipment | 123 | 189 |
| Acquisitions of intangible assets | 4 | 4 |
| Capital expenditure | 127^a | 193 |
| Acquisitions of non-current financial assets (investments in consolidated and non-consolidated companies and other long-term investments) | 40 ^b | 17 |
| Acquisitions of non-current assets | 167 | 210 |
| Disposals of non-current assets | (56) ^c | (46) |
| Acquisitions of non-current assets, net of disposals | 111 | 164 |

(a) Corresponds to the total of the "Purchase price of property, plant and equipment and intangible assets" line in the consolidated cash flow statement.

(b) Corresponds to the total of the "Purchase price of non-consolidated companies and other investments" and "Purchase price of investments in consolidated activities" lines in the consolidated cash flow statement.

(c) Corresponds to the total of the "Proceeds from disposals of property, plant and equipment and intangible assets", "Proceeds from disposals of non-consolidated companies and other investments" and "Proceeds from disposals of investments in consolidated activities" lines in the consolidated cash flow statement.

3.2. NON-CURRENT ASSETS: MOVEMENTS DURING THE PERIOD

3.2.1. PROPERTY, PLANT AND EQUIPMENT

| Gross value | Land and buildings | Plant, equipment and tooling | Other property, plant and equipment | PP&E under construction and advance payments | Total |
|--|--------------------|------------------------------|-------------------------------------|--|--------------|
| 31/12/2020 | 513 | 941 | 391 | 31 | 1,876 |

| Sub-total | 27 | - | 22 | - |
| Total | 37 | - | 32 | - |

(a) Not consolidated because:

- the Group does not exercise control or significant influence over the entity;
- the potential contribution of the entity to the consolidated financial statements is immaterial.

3.2.7.2. Other non-current financial assets

The main items included in "Other non-current financial assets" are:

| | 31/12/2022 | 31/12/2021 |
|---|------------|------------|
| Loans and advances to subsidiaries and affiliates | 47 | 68 |
| Non-current loans and receivables | 99 | 99 |
| Other long-term investments | 19 | 18 |
| • Deposits and caution money | 17 | 17 |
| • Other financial assets at fair value through profit or loss | 2 | 1 |

3.2.7.3. Analysis of investments in non-consolidated companies and other non-current financial assets by category

| | Equity instruments | | Other financial assets at fair value through profit or loss | Financial assets at amortised cost | Total |
|-----------------------------|--|--------------------------------------|---|------------------------------------|------------|
| | at fair value through OCI ^a | at fair value through profit or loss | | | |
| 31/12/2021 | 4 | 28 | - | 185 | 217 |
| Movements during 2022 | 1 | 4 | - | (24) | (19) |
| Held-for-sale operations | - | - | - | 4 | 4 |
| 31/12/2022 | 5 | 32 | - | 165 | 202 |
| Due within less than 1 year | - | - | - | 9 | 9 |
| Due within 1 to 5 years | - | - | - | 65 | 65 |
| Due after more than 5 years | 5 | 32 | - | 91 | 128 |

(a) Movements recognised in "Other Comprehensive Income" (consolidated statement of recognised income and expense).

3.2.7.4. Analysis of financial assets and liabilities by fair value hierarchy level

Under IFRS 13, the fair value hierarchy that reflects the significance of the inputs used in making fair value measurements has three levels:

- level 1 (unadjusted quoted prices): price accessible to the entity on the date of measurement in active markets, for identical assets or liabilities;
- level 2 (observable inputs): inputs relating to the asset or liability, other than quoted market prices classified as level 1 inputs, that are observable either directly (such

as a price) or indirectly (i.e. derived from observable prices); and

- level 3 (unobservable inputs): inputs that are not observable on markets, including observable inputs that require significant adjustment (for example, extrapolation of yield curves over long, unobservable periods). Within the Bouygues Construction group, this applies mainly to investments in some non-consolidated companies.

| | Level 1 Quoted market prices | Level 2 Observable inputs | Level 3 Unobservable inputs | 31/12/2022 |
|--|---------------------------------|------------------------------|--------------------------------|--------------|
| Financial assets at fair value through OCI ^a | - | - | 5 | 5 |
| Financial assets at fair value through profit or loss | - | - | 32 | 32 |
| Net cash position | 3,991 | - | - | 3,991 |
| Financial instruments: assets & liabilities (short-term) | 6 | - | - | 6 |

(a) Movements recognised in "Other Comprehensive Income" (consolidated statement of recognised income and expense).

NOTE 4. CURRENT ASSETS

4.1. INVENTORIES

| | 31/12/2022 | | | 31/12/2021 | | |

| Total | (3) | (2) | 4 | 8 |

4.2. ADVANCES AND DOWN-PAYMENTS MADE ON ORDERS

| | 31/12/2022 | | | 31/12/2021 | | |
|---|-------------|------------|-----------------|-------------|------------|-----------------|
| | Gross value | Impairment | Carrying amount | Gross value | Impairment | Carrying amount |
| Advances and down-payments made on orders | 106 | - | 106 | 91 | - | 91 |
| Total | 106 | - | 106 | 91 | - | 91 |

4.3. TRADE RECEIVABLES, TAX ASSETS AND OTHER CURRENT RECEIVABLES

| | 31/12/2022 | | | 31/12/2021 | | |
|--|--------------|--------------|-----------------|--------------|--------------|-----------------|
| | Gross value | Impairment | Carrying amount | Gross value | Impairment | Carrying amount |
| Trade receivables | 1,349 | (207) | 1,142 | 1,350 | (212) | 1,138 |
| Customer contract assets | 668 | - | 668 | 635 | - | 635 |
| Current tax assets | 39 | (1) | 38 | 50 | (1) | 49 |
| Other current receivables and prepaid expenses | 915 | (50) | 865 | 963 | (48) | 915 |
| • Other current receivables (employees, social security, government & other) | 360 | (6) | 354 | 330 | (5) | 325 |
| • Sundry receivables (including current accounts) | 480 | (45) | 435 | 542 | (43) | 499 |
| • Prepaid expenses | 75 | - | 75 | 91 | - | 91 |
| Total | 2,971 | (258) | 2,713 | 2,998 | (261) | 2,737 |

4.4. CUSTOMER CONTRACT ASSETS

| | 31/12/2021 | Movements during 2022 | | | | 31/12/2022 |
|---|------------|-------------------------|---|---|--------------------------|------------|
| | | Translation adjustments | Changes in scope of consolidation & other movements | Movements arising from operating activities | Held-for-sale operations | |
| Customer contract origination costs | - | - | - | - | - | - |
| Customer contract execution costs | - | - | - | - | - | - |
| Differences relating to percentage of completion on contracts | 635 | 9 | - | 42 | (18) | 668 |
| Total customer contract assets | 635 | 9 | - | 42 | (18) | 668 |

4.5. SPLIT OF CARRYING AMOUNT OF TRADE RECEIVABLES BETWEEN NON PAST DUE AND PAST DUE BALANCES

| | Non past due balances | Past due by: | | | Total |
|--|-----------------------|--------------|-------------|------------|--------------|
| | | 0-6 months | 6-12 months | >12 months | |
| Trade receivables | 761 | 267 | 26 | 295 | 1,349 |
| Impairment of trade receivables | (4) | (5) | (3) | (195) | (207) |
| Total trade receivables at 31/12/2022 | 757 | 262 | 23 | 100 | 1,142 |
| Total trade receivables at 31/12/2021 | 850 | 151 | 36 | 101 | 1,138 |

4.6. CASH AND CASH EQUIVALENTS

| | 31/12/2022 | | | 31/12/2021 | | |
|------------------------|--------------|------------|-----------------|--------------|------------|-----------------|
| | Gross value | Impairment | Carrying amount | Gross value | Impairment | Carrying amount |
| Bouygues Relais | 2,294 | - | 2,294 | 2,433 | - | 2,433 |
| Uniservice | 1,247 | - | 1,247 | 1,364 | - | 1,364 |
| By Construction Relais | - | - | - | - | - | - |
| Other cash items | 689 | - | 689 | 671 | - | 671 |
| Cash equivalents | 5 | - | 5 | 6 | - | 6 |
| Total | 4,235 | - | 4,235 | 4,474 | - | 4,474 |

"Cash and cash equivalents" as reported in the balance sheet as of 31 December 2022 includes €35 million that the Energies & Services business segment has deposited with cash pooling subsidiaries within the Bouygues Construction group (which remain part of continuing operations). A total of €1,026 million of cash and cash equivalents deposited by the Energies & Services business segment with non-Group third parties has been reclassified to "Held-for-sale assets and operations" in accordance with IFRS 5.

Cash equivalents are measured at fair value and are readily convertible into cash.

| | Euro | Pound sterling | Swiss franc | Other European currencies | Hong Kong dollar | Australian dollar | US dollar | Canadian dollar | Singapore dollar | Other currencies | Total 31/12/2022 | Total 31/12/2021 |
|-------------------------|--------------|----------------|-------------|---------------------------|------------------|-------------------|------------|-----------------|------------------|------------------|------------------|------------------|
| Cash | 2,500 | 296 | 406 | 21 | 306 | 241 | 230 | 3 | 76 | 151 | 4,230 | 4,468 |
| Cash equivalents | - | - | 1 | - | - | - | - | - | - | 4 | 5 | 6 |
| Total 31/12/2022 | 2,500 | 296 | 407 | 21 | 306 | 241 | 230 | 3 | 76 | 155 | 4,235 | - |
| Total 31/12/2021 | 2,672 | 387 | 354 | 37 | 287 | 353 | 187 | 7 | 29 | 161 | - | 4,474 |

As of 31 December 2022, cash and cash equivalents deposited by the Energies & Services business segment with cash pooling subsidiaries within the Bouygues Construction group break down by currency as follows:

| | Euro | Pound sterling | Total 31/12/2022 |
|-------------------------|-----------|----------------|------------------|
| Cash | 35 | - | 35 |
| Cash equivalents | - | - | - |
| Total 31/12/2022 | 35 | - | 35 |

The net cash position shown in the cash flow statement breaks down as follows:

| | 31/12/2022 | 31/12/2021 |
|---|--------------|--------------|
| Cash | 4,230 | 4,468 |
| Cash equivalents | 5 | 6 |
| Total cash and cash equivalents | 4,235 | 4,474 |
| Overdrafts and short-term bank borrowings | (244) | (358) |
| Net cash position | 3,991 | 4,116 |

The net cash position reported in the balance sheet as of 31 December 2022 includes €32 million that the Energies & Services business segment has deposited with cash pooling subsidiaries of the Bouygues Construction group (which remain part of continuing operations).

NOTE 5. SHAREHOLDERS' EQUITY

5.1. SHARE CAPITAL OF BOUYGUES CONSTRUCTION SA

As of 31 December 2022, the share capital of Bouygues Construction SA consisted of 1,788,177 shares with a €75 par value. During the fourth quarter of 2022, a capital increase of €330 million was subscribed by Bouygues SA, of which €6 million was allocated to share capital and €324 million to share premium.

Movements during 2022 were as follows:

| | 31/12/2021 | Movements during 2022 | | 31/12/2022 |
|--------------------------|--------------------|-----------------------|------------|--------------------|
| | | Increases | Reductions | |
| Shares | 1,706,230 | 81,947 | - | 1,788,177 |
| Number of shares | 1,706,230 | 81,947 | - | 1,788,177 |
| Par value (in euros) | 75 | - | - | 75 |
| Share capital (€) | 127,967,250 | - | - | 134,113,275 |

5.2. ITEMS RECOGNISED DIRECTLY IN EQUITY

5.2.1. ANALYSIS OF "INCOME AND EXPENSES RECOGNISED DIRECTLY IN EQUITY"

| | 31/12/2021 | Movements during 2022 | | 31/12/2022 |
|---|-------------|-----------------------|--------------------------|-------------|
| | | Continuing operations | Held-for-sale operations | |
| Reserve for actuarial gains/(losses), net of tax | (68) | 3 | 13 | (52) |
| Fair value remeasurement reserve (equity instruments), net of tax | (4) | - | - | (4) |
| Translation reserve of controlled entities | 5 | 4 | - | 9 |
| Fair value remeasurement reserve (hedging instruments), net of tax | (6) | 4 | 1 | (1) |
| Share of remeasurements of joint ventures and associates | 3 | (1) | 1 | 3 |
| Total attributable to the Group | (70) | 10 | 15 | (45) |
| Other income and expenses attributable to non-controlling interests | 1 | - | - | 1 |
| Total | (69) | 10 | 15 | (44) |

5.2.2. TRANSLATION RESERVE (ATTRIBUTABLE TO THE GROUP)

The translation reserve represents translation differences arising since 1 January 2004, when the reserve was deemed to be zero in accordance with IFRS 1.

It includes cumulative translation differences arising on subsidiaries, joint ventures and associates.

Principal translation adjustments in the year ended 31 December 2022 arising on the consolidated financial statements of foreign entities reporting in the following currencies:

| Currency | 31/12/2021 | Movements during 2022 | 31/12/2022 |
|-------------------|------------|-----------------------|------------|
| Australian dollar | 8 | 3 | 11 |
| Pound sterling | 12 | (2) | 10 |
| Swiss franc | 4 | - | 4 |
| Hong Kong dollar | (2) | 5 | 3 |
| Singapore dollar | 3 | (1) | 2 |
| Canadian dollar | (1) | - | (1) |
| US dollar | (7) | (1) | (8) |
| Other currencies | (7) | (1) | (8) |
| Total | 10 | 3 | 13 |

| Held-for-sale operations | 2 | (8) | 11 | 1 | 6 |
| 31/12/2022 | 52 | 184 | 274 | 95 | 605 |

NOTE 7. DEFERRED TAX ASSETS AND LIABILITIES

7.1. DEFERRED TAX ASSETS

| Movement in deferred taxes in the consolidated balance sheet | 31/12/2021 | Movements during 2022 | | Held-for-sale operations | 31/12/2022 |
|---|------------|-----------------------|--------------------|-----------------------------|------------|
| | | Income/ (expense) | Other movements | | |
| Deferred tax assets | 57 | (11) | - | 13 | 59 |

7.2. DEFERRED TAX LIABILITIES

| Movement in deferred taxes in the consolidated balance sheet | 31/12/2021 | Movements during 2022 | | Held-for-sale operations | 31/12/2022 |
|---|------------|-----------------------|--------------------|-----------------------------|------------|
| | | Income/ (expense) | Other movements | | |
| Deferred tax liabilities | 24 | 6 | - | (3) | 27 |

7.3. DEFERRED TAX ASSETS BY BUSINESS SEGMENT

| | Net deferred tax asset/ (liability) 31/12/2021 | Changes in scope of consolidation | Translation adjustments | Movements during 2022 | | Other movements | Held- for-sale operations | Net deferred tax asset/ (liability) 31/12/2022 |
|---|---|---|----------------------------|---|---|--------------------|---------------------------------|---|
| | | | | Income/ (expense) recognised in profit or loss | Income/ (expense) recognised in equity | | | |
| A. Tax losses | | | | | | | | |
| Building & Civil Works | 1 | - | - | - | - | - | - | 1 |
| Energies & Services | - | - | - | (1) | - | - | 1 | - |
| Sub-total | 1 | - | - | (1) | - | - | 1 | 1 |
| B. Temporary differences^a | | | | | | | | |
| Building & Civil Works | 32 | - | - | 1 | (2) | - | - | 31 |
| Energies & Services | - | - | - | (14) | (1) | - | 15 | - |
| Sub-total | 32 | - | - | (13) | (3) | - | 15 | 31 |
| Total | 33 | - | - | (14) | (3) | - | 16 | 32 |

(a) Arising on differences between tax and accounting treatments, and on consolidation adjustments.

Principal sources of deferred taxation:

| | 31/12/2022 | 31/12/2021 |
|--|-------------|------------|
| Employee benefits | 33 | 38 |
| Provisions temporarily non-deductible for tax purposes | 28 | 26 |
| Tax losses | 1 | 1 |
| Other sources of deferred taxation | (30) | (32) |
| Total | 32 | 33 |

7.4. ESTIMATED PERIOD TO RECOVERY OF DEFERRED TAX ASSETS

| 31 December 2022 | Less than 2 years | 2 to 5 years | More than 5 years | Total |
|---------------------|-------------------|--------------|-------------------|-------|
| Deferred tax assets | 33 | 9 | 17 ^a | 59 |

(a) Relates mainly to lump-sum retirement benefits and pensions.

7.5. UNRECOGNISED DEFERRED TAX ASSETS

Some deferred tax assets were not recognised as of 31 December 2022 due to the low probability of recovery (mainly tax losses generated abroad or in France).

| | 31/12/2022 | 31/12/2021 |
|-----------------------------|------------|------------|
| Bouygues group tax election | 71 | 75 |
| Other assets | 337 | 343 |
| Total | 408 | 418 |

NOTE 8. NON-CURRENT AND CURRENT DEBT

8.1. INTEREST-BEARING DEBT BY MATURITY

| | Current debt | | Non-current debt | | | | | | Total 31/12/2022 | Total 31/12/2021 |
|--|---------------|----------------|------------------|-----------|------------|------------|-----------|---------------------|---------------------|---------------------|
| | 0-3 months | 3-12 months | 1-2 years | 2-3 years | 3-4 years | 4-5 years | 5-6 years | 6 years & beyond | | |
| Bond issues | - | - | - | - | - | - | - | - | - | - |
| Bank borrowings | 1 | 1 | 6 | - | - | - | - | - | 8 | 2 |
| Other borrowings | 9 | 1 | 3 | 2 | 3 | 23 | - | - | 41 | 30 |
| Uniservice borrowings | - | - | - | - | - | 301 | - | - | 301 | 854 |
| Total interest-bearing borrowings | 10 | 2 | 9 | 2 | 3 | 324 | - | - | 350 | - |
| Total 31/12/2021 | 1 | 4 | 240 | 71 | 478 | 72 | 4 | 16 | - | 886 |

Debt reported in the balance sheet as of 31 December 2022 does not include any debt contracted by Bouygues Construction SA on behalf of the Energies & Services business segment, which has contracted debt directly with cash pooling subsidiaries of the Bouygues group.

A total of €583 million of debt contracted by the Energies & Services business segment with Bouygues group cash pooling subsidiaries and with non-Group third parties has been reclassified to "Liabilities related to held-for-sale operations" in accordance with IFRS 5.

8.2. CONFIRMED CREDIT FACILITIES AND DRAWDOWNS

| | Confirmed facilities – Maturity | | | | Drawdowns – Maturity | | | |
|------------------------------------|---------------------------------|--------------|-----------|------------|----------------------|--------------|-----------|------------|
| | Less than 1 year | 1 to 5 years | > 5 years | Total | Less than 1 year | 1 to 5 years | > 5 years | Total |
| Bond issues | - | - | - | - | - | - | - | - |
| Bank borrowings | 2 | 6 | - | 8 | 2 | 6 | - | 8 |
| Other borrowings | 10 | 31 | - | 41 | 10 | 31 | - | 41 |
| Uniservice borrowings ^a | - | 630 | - | 630 | - | 301 | - | 301 |
| Total | 12 | 667 | - | 679 | 12 | 338 | - | 350 |

(a) Confirmed undrawn credit facilities: €329 million.

8.3. LIQUIDITY AT 31 DECEMBER 2022

As of 31 December 2022, available cash stood at €3,991 million. The Group also had €329 million of undrawn confirmed credit facilities as of that date.

(a) Non-current debt (€338 million) and current debt (€12 million).

Consequently, the Group is not exposed to liquidity risk.

The bank credit facilities contracted by the Bouygues Construction group contain no financial covenants or trigger event clauses.

8.4. FIXED/FLOATING RATE SPLIT OF CURRENT AND NON-CURRENT DEBT

Split of current and non-current debt, including the effect of all open interest rate hedges at the end of the reporting period:

| (%) | 31/12/2022 | 31/12/2021 |
|------------------------------|------------|------------|
| Fixed rate debt ^a | - | - |
| Floating rate debt | 100% | 100% |

(a) Rates fixed for more than one year.

8.5. SPLIT OF CURRENT AND NON-CURRENT DEBT BY CURRENCY

| | Europe | | | | Canadian dollar | US dollar | Australian dollar | Hong Kong dollar | Singapore dollar | Other currencies | Total |
|-------------------------------|--------|----------------|-------------|---------------------------|-----------------|-----------|-------------------|------------------|------------------|------------------|-------|
| | Euro | Pound Sterling | Swiss franc | Other European currencies | | | | | | | |
| Non-current 31/12/2022 | 45 | 12 | 77 | 27 | - | 107 | 62 | 8 | - | - | 338 |
| Current 31/12/2022 | 1 | - | 1 | - | - | 7 | - | - | - | 3 | 12 |
| Non-current 31/12/2021 | 45 | 55 | 495 | 20 | 99 | 97 | 62 | 8 | - | - | 881 |
| Current 31/12/2021 | - | - | 1 | - | - | - | - | - | - | 4 | 5 |

As of 31 December 2022, no debt had been contracted by Bouygues Construction SA on behalf of the Energies & Services business segment, which contracted its debt directly with cash pooling subsidiaries of the Bouygues group and with non-Group third parties.

NOTE 9. MAIN COMPONENTS OF CHANGE IN NET DEBT

9.1. CHANGE IN NET SURPLUS CASH

| | 31/12/2021 | Cash flows | Cash flows from discontinued operations | Changes in scope of consolidation | Translation adjustments | Fair value adjustments | Other movements | Held-for-sale operations | 31/12/2022 |
|---|--------------|------------------------|---|-----------------------------------|-------------------------|------------------------|----------------------|--------------------------|--------------|
| Cash and cash equivalents | 4,474 | (265) | (73) | 1 | 25 | - | - | 73 | 4,235 |
| Overdrafts and short-term bank borrowings | (358) | 948 | (299) | - | 2 | - | - | (537) | (244) |
| Net Cash Position (A) | 4,116 | 683^a | (372)^a | 1^a | 27^a | -^a | -^a | (464)^a | 3,991 |
| Non-current debt | (881) | (8) ^b | (20) | - | (8) | - | - | 579 | (338) |
| Current debt | (5) | (7) ^b | - | - | - | - | - | - | (12) |
| Financial instruments - Hedging of debt | - | - | - | - | - | - | - | - | - |
| Total Debt (B) | (886) | (15) | (20) | - | (8) | - | - | 579 | (350) |
| Net Surplus Cash (A) + (B) | 3,230 | 668 | (392) | 1 | 19 | - | - | 115 | 3,641 |

(a) Net cash outflow of €125 million in 2022, as reported in the cash flow statement.

(b) Net cash inflow related to current and non-current debt of €15 million in 2022 as reported in the cash flow statement, comprising an increase of €16 million in total debt and a reduction of €1 million.

The net cash position reported in the balance sheet as of 31 December 2022 includes €32 million that the Energies & Services business segment has deposited with cash pooling subsidiaries within the Bouygues Construction group. Debt reported in the balance sheet as of 31 December 2022 does not include any debt contracted by Bouygues Construction SA on behalf of the Energies & Services business segment. Consequently, net surplus cash of continuing operations as of 31 December 2022 (€3,641 million) as reported under IFRS 5 includes €32 million of net surplus cash from the Energies & Services business segment.

9.2. PRINCIPAL CHANGES IN NET SURPLUS CASH DURING 2022

| | |
|--|--------------|
| Net Surplus Cash at 31/12/2021 | 3,230 |
| Net cash generated by/(used in) operating activities | 307 |
| Net cash generated by/(used in) investing activities | (57) |
| Share capital transactions | 330 |
| Dividends paid | (277) |
| Income from net surplus cash and interest expense on lease obligations | 9 |
| Effect of changes in scope of consolidation on total debt | - |
| Effect of exchange rates on net cash position and total debt | 19 |
| Repayment of lease obligations | (42) |
| Other items | 399 |
| Cash flows from discontinued operations and reclassification of held-for-sale operations | (277) |
| Net Surplus Cash at 31/12/2022 | 3,641 |

NOTE 10. NON-CURRENT LEASE AND CURRENT LEASE OBLIGATIONS

10.1. ANALYSIS OF CURRENT AND NON-CURRENT LEASE OBLIGATIONS BY MATURITY

| | Current lease obligations | | | Non-current lease obligations | | | | | | Total maturing after >1 year |
|-------------------------|---------------------------|-------------|---------------------------|-------------------------------|-----------|-----------|-----------|-----------|------------------|------------------------------|
| | 1-3 months | 3-12 months | Total maturing in <1 year | 1-2 years | 2-3 years | 3-4 years | 4-5 years | 5-6 years | 6 years & beyond | |
| Total 31/12/2022 | 10 | 29 | 39 | 29 | 22 | 18 | 10 | 7 | 9 | 95 |
| Total 31/12/2021 | 9 | 28 | 37 | 31 | 21 | 18 | 15 | 8 | 13 | 106 |

10.2. CHANGE IN NON-CURRENT AND CURRENT LEASE OBLIGATIONS

| | 31/12/2021 | Translation adjustments | Changes in scope of consolidation | Lease payments made | New leases, lease modifications, and other lease-related movements | Total maturing after >1 year | 31/12/2022 |
|--------------------------------|------------|-------------------------|-----------------------------------|---------------------|--|------------------------------|------------|
| Non-current lease obligations | 106 | 1 | - | - | (21) | 9 | 95 |
| Current lease obligations | 37 | 1 | - | (70) | 71 | - | 39 |
| Total Lease Obligations | 143 | 2 | - | (70) | 50 | 9 | 134 |

NOTE 11. OTHER CURRENT LIABILITIES

| | 31/12/2022 | 31/12/2021 |
|--|------------|------------|
| Current tax liabilities | 70 | 75 |
| Trade payables | 2,282 | 2,133 |
| Customer contract liabilities | 1,900 | 2,004 |
| Other current liabilities | 1,438 | 1,445 |
| • Employee-related and social security liabilities | 428 | 398 |
| • Amounts due to government and local authorities | 490 | 444 |
| • Other current payables | 520 | 603 |
| Overdrafts and short-term bank borrowings | 244 | 358 |

Overdrafts and short-term bank borrowings reported in the balance sheet as of 31 December 2022 include €3 million loaned to the Energies & Services business segment by the cash pooling subsidiaries of the Bouygues Construction group (which remain part of continuing operations). Only the €267 million of overdrafts and short-term bank borrowings contracted by the Energies & Services business segment with non-Group third parties has been reclassified to "Held-for-sale assets and operations" in accordance with IFRS 5.

11.1. CUSTOMER CONTRACT LIABILITIES

| | 31/12/2021 | Movements during 2022 | | | | 31/12/2022 |
|---|--------------|-------------------------|---|---|--------------------------|--------------|
| | | Translation adjustments | Changes in scope of consolidation & other movements | Movements arising from operating activities | Held-for-sale operations | |
| Advances and down-payments received on orders | 486 | 4 | - | 22 | 6 | 518 |
| Differences relating to percentage of completion on contracts | 1,518 | 10 | (5) | (169) | 28 | 1,382 |
| Customer Contract Liabilities | 2,004 | 14 | (5) | (147) | 34 | 1,900 |

11.2. OVERDRAFTS AND SHORT-TERM BANK BORROWINGS

| | Europe | | | | Hong Kong dollar | Canadian dollar | Singapore dollar | US dollar | Australian dollar | Other currencies ^a | Total |
|--|-----------|----------------|-------------|---------------------------|------------------|-----------------|------------------|-----------|-------------------|-------------------------------|------------|
| | Euro | Pound Sterling | Swiss franc | Other European currencies | | | | | | | |
| Split by currency at 31/12/2022 | 72 | 12 | 26 | 1 | 86 | - | - | 7 | 7 | 33 | 244 |
| Split by currency at 31/12/2021 | 165 | 56 | 32 | 4 | 61 | 2 | 3 | 2 | - | 33 | 358 |

(a) "Other currencies" mainly relate to Africa: €13 million in 2022, €19 million in 2021.

As of 31 December 2022, overdrafts and short-term bank borrowings loaned by the cash pooling subsidiaries of the Bouygues Construction group to the Energies & Services business segment break down by currency as follows:

| | Euro | Pound Sterling | Total |
|--|----------|----------------|----------|
| Split by currency at 31/12/2022 | 3 | - | 3 |

NOTE 12. SALES

12.1. ANALYSIS OF SALES – FRANCE/INTERNATIONAL

Sales by geographical area are allocated to the territory in which the sale is generated.

| | FY 2022 | | |
|--------------|--------------|---------------|--------------|
| | France | International | Total |
| Sales | 4,002 | 5,304 | 9,306 |

| | FY 2021 | | |
|------------------------|--------------|---------------|--------------|
| | France | International | Total |
| Sales | 3,998 | 4,902 | 8,900 |
| % change 2022 vs. 2021 | 0% | 8% | 5% |

There were no material exchanges of goods or services in the years ended 31 December 2022 and 2021, and there is no material revenue that is contingent on a performance obligation that pre-dates the reporting period.

BY GEOGRAPHICAL AREA

12.2. ANALYSIS OF SALES BY GEOGRAPHICAL AREA

| | 2022 sales | | 2021 sales | |
|-----------------------------|--------------|---------------|--------------|---------------|
| | Total | % | Total | % |
| France | 4,002 | 43.0% | 3,998 | 44.9% |
| European Union (27 members) | 357 | 3.9% | 320 | 3.7% |
| Rest of Europe | 2,217 | 23.8% | 2,023 | 22.7% |
| Africa | 561 | 6.0% | 358 | 4.0% |
| Middle East | 41 | 0.4% | 26 | 0.3% |
| Americas | 455 | 4.9% | 330 | 3.7% |
| Asia/Pacific/Oceania | 1,673 | 18.0% | 1,845 | 20.7% |
| Total | 9,306 | 100.0% | 8,900 | 100.0% |

The UK accounted for 69% of 2022 sales from continuing operations in the "Rest of Europe" region. These operations are carried out locally within the United Kingdom, and have no material exposure to uncertainties relating to imports and exports.

12.3. ANALYSIS OF SALES BY TYPE OF CONTRACT

| (%) | 2022 | | | 2021 | | |
|--------------------------------------|--------|---------------|-------|--------|---------------|-------|
| | France | International | Total | France | International | Total |
| Public-sector contracts ^a | 37% | 41% | 39% | 40% | 34% | 37% |
| Private-sector contracts | 63% | 59% | 61% | 60% | 66% | 63% |

(a) Sales billed directly to government departments, local authorities or public enterprises in France and abroad.

12.4. ORDER BACKLOG

| | 31/12/2021 | Movements during 2022 | | | | 31/12/2022 |
|----------------------------------|---------------|-------------------------|---|---------------|------------------|---------------|
| | | Translation adjustments | Changes in scope of consolidation and other movements | Order intake | Sales recognised | |
| Total Order Backlog | 20,759 | 530 | 413 | 12,053 | (13,167) | 20,588 |
| maturing within less than 1 year | 9,679 | - | - | - | - | 10,308 |
| maturing within 1 to 5 years | 9,018 | - | - | - | - | 8,340 |
| maturing after more than 5 years | 2,062 | - | - | - | - | 1,940 |

The order backlog represents the amount of work still to be done on projects for which a firm order has been taken, i.e. the contract has been signed and has taken effect (after notice to proceed has been issued and suspensive conditions lifted).

The order backlog for held-for-sale operations was €6,458 million as of 31 December 2022.

NOTE 13. OPERATING PROFIT/(LOSS) AND EBITDA AFTER LEASES

13.1. OPERATING PROFIT

| | 2022 | 2021 |
|--|-------------|-------------|
| Current Operating Profit/(Loss) | 276 | 234 |
| Other operating income | - | - |
| Other operating expenses | (72) | - |
| Operating Profit/(Loss) | 204 | 234 |
| Current operating margin | 3.0% | 2.6% |

Current operating profit for 2022 includes lease expense of €242 million relating to payments on leases exempt from IFRS 16 (see Note 2.4.2.1). The non-lease (service) component is recognised in "External charges".

"Other operating expenses" mainly comprise:

- costs of €52 million relating to a regulatory change in a country where the Bouygues Construction group operates;
- costs of €11 million arising on the transfer of the Energies & Services business to Equans; and
- restructuring costs of €8 million.

13.2. EBITDA AFTER LEASES

| | 2022 | 2021 |
|---|------------|------------|
| Current Operating Profit | 276 | 234 |
| Interest expense on lease obligations | (6) | (5) |
| Elimination of net depreciation and amortisation expense and net charges to provisions and impairment losses: | | |
| • Net depreciation and amortisation expense on property, plant and equipment and intangible assets | (168) | (178) |
| • Charges to provisions and impairment losses, net of reversals due to utilisation | 5 | (145) |
| Elimination of items included in "Other income from operations": | | |
| • Reversals of unutilised provisions and impairment and other items | 119 | 181 |
| EBITDA after Leases | 314 | 371 |

NOTE 14. INCOME FROM NET SURPLUS CASH AND OTHER FINANCIAL INCOME AND EXPENSES

14.1. ANALYSIS OF INCOME FROM NET SURPLUS CASH

| | 2022 | 2021 |
|--|-------------|-------------|
| Cost of total debt | (16) | (12) |
| Net interest expense on debt | (16) | (12) |
| Impact of financial instruments on debt | - | - |
| Income from cash and cash equivalents | 31 | 20 |
| Net interest income from cash and cash equivalents | 31 | 20 |
| Impact of financial instruments on cash and cash equivalents | - | - |
| Income from net surplus cash | 15 | 8 |

14.2. ANALYSIS OF OTHER FINANCIAL INCOME AND EXPENSES

| | 2022 | 2021 |
|---|-----------|-----------|
| Dividends from non-consolidated entities | 8 | 4 |
| Net decrease/(increase) in financial provisions | - | 14 |
| Net discounting expense | - | - |
| Change in fair value of other financial assets and liabilities | 17 | - |
| Current account waivers, gains and losses on disposals of investments in non-consolidated companies and of other financial assets, net interest other than on debt, and other items | 15 | 11 |
| Total other financial income and expenses | 40 | 29 |

NOTE 15. INCOME TAXES

15.1. ANALYSIS OF INCOME TAX EXPENSE

| | 2022 | | | 2021 | | |
|---|-------------|-----------------|-------------|-------------|-----------------|--------------|
| | France | Other countries | Total | France | Other countries | Total |
| Tax payable to the tax authorities | (41) | (39) | (80) | (41) | (52) | (93) |
| Change in deferred tax liabilities ^a | (3) | 1 | (2) | (4) | - | (4) |
| Change in deferred tax assets ^a | 4 | (1) | 3 | - | 1 | 1 |
| Taxes on dividends | - | (4) | (4) | - | (5) | (5) |
| Total | (40) | (43) | (83) | (45) | (56) | (101) |

| | 2022 | 2021 |
|---|------|------|
| (a) Deferred tax arising from temporary differences | 1 | (3) |
| Deferred tax arising from tax losses | - | - |
| Deferred tax arising from changes in tax rates | - | - |

15.2. TAX PROOF (RECONCILIATION BETWEEN STANDARD TAX RATE AND EFFECTIVE TAX RATE)

Differences between the standard corporate income tax rate applicable in France and the effective tax rate based on the consolidated financial statements are explained as follows:

| | 2022 | 2021 |
|--|---------------|---------------|
| Net profit/(loss) for the period | 311 | 284 |
| Eliminations | | |
| Income tax expense | 83 | 101 |
| Net (profits)/losses of divested, discontinued and held-for-sale operations | (148) | (111) |
| Share of net (profits)/losses of joint ventures and associates | 7 | (8) |
| Net pre-tax profit/(loss) from continuing operations | 253 | 266 |
| Standard annual tax rate in France | 25.83% | 28.41% |
| Effect of non-recognition of tax loss carry-forwards and other temporary differences: created/(utilised) | 7.74% | 12.40% |
| Effect of permanent differences | 1.07% | 5.42% |
| Flat-rate taxes, dividend taxes and tax credits | 1.23% | 5.13% |
| Differential tax rates applied to gains on disposals | (1.23%) | (0.44%) |
| Differential income tax rates, foreign taxes, impact of future enacted tax rates | (1.84%) | (13.04%) |
| Effective tax rate | 32.79% | 37.88% |

NOTE 16. BASIC/DILUTED EARNINGS PER SHARE FROM CONTINUING OPERATIONS

Basic earnings per share from continuing operations is calculated by dividing net profit from continuing operations attributable to the Group by the weighted average number of shares outstanding during the year (excluding the average number of ordinary shares bought and held as treasury shares), i.e. 1,726,436 shares.

| | 2022 | 2021 |
|---|---------------|----------------|
| Net profit from continuing operations attributable to the Group | €163m | €171m |
| Weighted average number of shares outstanding | 1,726,436 | 1,706,230 |
| Basic earnings per share from continuing operations | €94.32 | €100.48 |

Diluted earnings per share from continuing operations is calculated by reference to the weighted average number of shares outstanding, adjusted for the conversion of all potentially dilutive shares. There are no dilutive instruments, so the two figures are the same.

| | 2022 | 2021 |
|---|---------------|----------------|
| Net profit from continuing operations attributable to the Group | €163m | €171m |
| Weighted average number of shares used to calculate diluted earnings per share from continuing operations | 1,726,436 | 1,706,230 |
| Diluted earnings per share from continuing operations | €94.32 | €100.48 |

NOTE 17. COMPONENTS OF NON-CURRENT ASSETS HELD FOR SALE AND DISCONTINUED OPERATIONS

The operations of the Energies & Services business segment meet the conditions set by IFRS 5 for classification within the "Held-for-sale assets and operations and discontinued operations" category as of 31 December 2022.

This note presents the components of those operations as of 31 December 2022.

17.1. NET PROFIT/(LOSS) FROM DISCONTINUED OPERATIONS

| | 2022 |
|--|--------------|
| Sales | 3,861 |
| Current operating profit/(loss) | 182 |
| Other operating income | - |
| Other operating expenses | (10) |
| Operating profit/(loss) | 172 |
| Income from net surplus cash/(cost of net debt) | 3 |
| Interest expense on lease obligations | (3) |
| Other financial income | 8 |
| Other financial expenses | (14) |
| Income tax | (30) |
| Share of profits/(losses) of joint ventures and associates | 12 |
| Net profit/(loss) | 148 |

17.2. NET CASH FLOWS FROM DISCONTINUED OPERATIONS

| | 2022 |
|---|--------------|
| Net cash generated by/(used in) operating activities | (4) |
| Net cash generated by/(used in) investing activities | 72 |
| Net cash generated by/(used in) financing activities | (426) |
| Effect of foreign exchange fluctuations | (14) |
| Change in net cash position | (372) |
| Net cash position at start of period | 1,163 |
| Net cash flows | (372) |
| Net cash position at end of period | 791 |

17.3. HELD-FOR-SALE ASSETS AND OPERATIONS, AND LIABILITIES RELATED TO HELD-FOR-SALE OPERATIONS

| Assets | 31/12/2022 net |
|---|----------------|
| Non-current assets | 1,264 |
| Current assets | 2,268 |
| Total: held-for-sale assets and operations | 3,532 |
| | |
| Liabilities | 31/12/2022 |
| Non-current liabilities | 777 |
| Current liabilities | 2,169 |
| Total: liabilities related to held-for-sale operations | 2,946 |

Details of IFRS 5 reclassifications to the balance sheet as of 31 December 2022 are shown below:

| Assets | 31/12/2021 net | 31/12/2022 before IFRS 5 reclassifications | IFRS 5 reclassifications | 31/12/2022 net |
|--|-------------------|--|-----------------------------|-------------------|
| Property, plant and equipment | 552 | 593 | (99) | 494 |
| Right of use of leased assets | 108 | 223 | (119) | 104 |
| Intangible assets | 11 | 17 | (5) | 12 |
| Goodwill | 283 | 1 229 | (931) | 298 |
| Investments in joint ventures and associates | 26 | 119 | (90) | 29 |
| Other non-current financial assets | 217 | 225 | (23) | 202 |
| Deferred tax assets | 57 | 56 | 3 | 59 |
| Non-current assets | 1,254 | 2,462 | (1,264) | 1,198 |
| Inventories | 205 | 273 | (40) | 233 |
| Advances and down-payments made on orders | 91 | 121 | (15) | 106 |
| Trade receivables | 1,138 | 1,681 | (539) | 1,142 |
| Customer contract assets | 635 | 1,109 | (441) | 668 |
| Current tax assets | 49 | 50 | (12) | 38 |
| Other current receivables and prepaid expenses | 915 | 1 059 | (194) | 865 |
| Cash and cash equivalents | 4,474 | 5,261 | (1,026) | 4,235 |
| Financial instruments – Hedging of debt | – | – | – | – |
| Other current financial assets | 14 | 14 | (1) | 13 |
| Current assets | 7,521 | 9,568 | (2,268) | 7,300 |
| Held-for-sale assets and operations | 2,937 | – | 3,532 | 3,532 |
| Total assets | 11,712 | 12,030 | – | 12,030 |

| Liabilities and shareholders' equity | 31/12/2021 | 31/12/2022 before IFRS 5 reclassifications | IFRS 5 reclassifications | 31/12/2022 net |
|---|---------------|--|-----------------------------|-------------------|

| Financial instruments – Hedging of debt | – | – | – | – |
| Other current financial liabilities | 9 | 8 | (1) | 7 |
| Current liabilities | 6,748 | 8,766 | (2,169) | 6,597 |
| Liabilities related to held-for-sale operations | 2,353 | – | 2,946 | 2,946 |
| Total liabilities and shareholders' equity | 11,712 | 12,030 | – | 12,030 |
| Net surplus cash/(net debt) | 3,230 | 3,817 | (176) | 3,641 |

NOTE 18. FINANCIAL INSTRUMENTS

The tables below show aggregate notional amounts for each type of financial instrument used, split by residual maturity and by currency.

18.1. INTEREST RATE AND CURRENCY HEDGES

18.1.1. ANALYSIS BY BUSINESS SEGMENT

| | 31/12/2022 | 31/12/2021 |
|--------------------------------------|------------|------------|
| Forward purchases | 416 | 534 |
| Forward sales | 278 | 263 |
| Currency swaps | 8 | 17 |
| Interest rate swaps | - | - |
| Interest rate options (caps, floors) | - | - |
| Commodities derivatives | 3 | 4 |
| Total | 705 | 818 |

18.1.2. ANALYSIS BY MATURITY AND ORIGINAL CURRENCY

| | 31/12/2022 | | | | | | | | | | | | |
|--------------------------------------|------------|--------------|-----------|------------|------------|-------------------|-----------|-----------|-----------|-----------|-----------|----------|-----------|
| | Maturity | | | | Total | Original currency | | | | | | | |
| | < 1 year | 1 to 5 years | > 5 years | EUR | | AUD | HKD | CHF | GBP | USD | HRK | CNY | Other |
| Forward purchases | 374 | 42 | - | 416 | 142 | 212 | 16 | 13 | 4 | 6 | 12 | 5 | 6 |
| Forward sales | 255 | 23 | - | 278 | 4 | 16 | 77 | 54 | 62 | 34 | 12 | 1 | 18 |
| Currency swaps | 8 | - | - | 8 | 1 | - | - | - | - | 2 | - | - | 5 |
| Interest rate swaps | - | - | - | - | - | - | - | - | - | - | - | - | - |
| Interest rate options (caps, floors) | - | - | - | - | - | - | - | - | - | - | - | - | - |
| Commodities derivatives | 3 | - | - | 3 | - | 3 | - | - | - | - | - | - | - |
| Total | 640 | 65 | - | 705 | 147 | 231 | 93 | 67 | 66 | 42 | 24 | 6 | 29 |

18.2. MARKET VALUE OF HEDGING INSTRUMENTS

31/12/2022

| Derivatives recognised as assets | Original currency | | | | | | | Total | Fair value hedge | Cash flow hedge | Hedge of net investment in a foreign operation |
|--------------------------------------|-------------------|----------|----------|----------|----------|----------|----------|-----------|------------------|-----------------|--|
| | EUR | AUD | GBP | USD | CHF | HKD | Other | | | | |
| Forward purchases | 1 | 9 | - | - | - | 1 | - | 11 | - | 11 | - |
| Forward sales | - | - | 1 | 1 | - | - | - | 2 | - | 2 | - |
| Currency swaps | - | - | - | - | - | - | - | - | - | - | - |
| Interest rate swaps | - | - | - | - | - | - | - | - | - | - | - |
| Interest rate options (caps, floors) | - | - | - | - | - | - | - | - | - | - | - |
| Commodities derivatives | - | - | - | - | - | - | - | - | - | - | - |
| Total assets | 1 | 9 | 1 | 1 | - | 1 | - | 13 | - | 13 | - |

31/12/2022

| Derivatives recognised as liabilities | Original currency | | | | | | | Total | Fair value hedge | Cash flow hedge | Hedge of net investment in a foreign operation |
|---------------------------------------|-------------------|----------|----------|------------|------------|------------|----------|------------|------------------|-----------------|--|
| | EUR | AUD | GBP | USD | CHF | HKD | Other | | | | |
| Forward purchases | (2) | - | - | (1) | - | - | - | (3) | - | (3) | - |
| Forward sales | - | - | - | - | (1) | (3) | - | (4) | - | (4) | - |
| Currency swaps | - | - | - | - | - | - | - | - | - | - | - |
| Interest rate swaps | - | - | - | - | - | - | - | - | - | - | - |
| Interest rate options (caps, floors) | - | - | - | - | - | - | - | - | - | - | - |
| Commodities derivatives | - | - | - | - | - | - | - | - | - | - | - |
| Total liabilities | (2) | - | - | (1) | (1) | (3) | - | (7) | - | (7) | - |
| Net total | (1) | 9 | 1 | - | (1) | (2) | - | 6 | - | 6 | - |

In the event of a +1.00% movement in the yield curve, the hedging instruments portfolio would have a positive market value of €5.7 million; in the event of a -1.00% movement, it would have a positive market value of €5.7 million.

In the event of a +1.00% movement in the exchange rate of the euro against the other currencies, the hedging instruments portfolio would have a positive market value of €7.2 million; in the event of a -1.00% movement, it would have a positive market value of €4.2 million.

These calculations were prepared by the Bouygues group, or obtained from the banks with which the instruments were contracted.

NOTE 19. OFF BALANCE SHEET COMMITMENTS AT 31 DECEMBER 2022

19.1. GUARANTEE COMMITMENTS

Guarantee commitments include held-for-sale operations.

| | 31/12/2022 | Less than 1 year | 1 to 5 years | More than 5 years |
|--|------------|------------------|--------------|-------------------|
| • Pledges, mortgages and collateral | 4 | - | 3 | 1 |
| • Guarantees and endorsements given ^a | 69 | 2 | 32 | 35 |
| Total guarantee commitments given | 73 | 2 | 35 | 36 |
| • Guarantees and endorsements received | - | - | - | - |
| Total guarantee commitments received | - | - | - | - |
| Net balance | 73 | 2 | 35 | 36 |

(a) In connection with its ordinary activities, the Group grants multi-year guarantees (such as ten-year building guarantees), which are usually covered by statistically-based provisions on the liabilities side of the balance sheet. Contract guarantees provided by banks to Group customers represent off balance sheet commitments for those banks. Where such guarantees are liable to result in payments being made, a provision is recognised in the balance sheet.

19.2. SUNDRY CONTRACTUAL COMMITMENTS

| | 31/12/2022 | Less than 1 year | 1 to 5 years | More than 5 years |
|---|------------|------------------|--------------|-------------------|
| • Lump-sum retirement benefit obligations | - | - | - | - |
| • Unmatured bills | - | - | - | - |
| • Other items | - | - | - | - |
| Total sundry contractual commitments given | - | - | - | - |
| • Lump-sum retirement benefit obligations | - | - | - | - |
| • Unmatured bills | - | - | - | - |
| • Other items | - | - | - | - |
| Total sundry contractual commitments given | - | - | - | - |
| Net balance | - | - | - | - |

No material off balance sheet commitments have been omitted from this disclosure, in accordance with applicable accounting standards.

NOTE 20. AVERAGE HEADCOUNT AND EMPLOYEE BENEFIT OBLIGATIONS

20.1. AVERAGE HEADCOUNT

| | 2022 | 2021 |
|---|---------------|---------------|
| Managerial staff | 10,114 | 10,083 |
| Technical, supervisory & clerical staff | 6,559 | 6,442 |
| Site workers | 5,078 | 5,393 |
| Sub-total: headcount in France | 21,751 | 21,918 |
| Expatriate staff and local employment contracts | 30,868 | 31,384 |
| Total average headcount* | 52,619 | 53,302 |

(a) Includes 20,488 relating to held-for-sale operations.

20.2. EMPLOYEE BENEFIT OBLIGATIONS

20.2.1. EMPLOYEE BENEFIT OBLIGATIONS

| | 31/12/2021 | Movements during 2022 | Held-for-sale operations | 31/12/2022 |
|---|------------|-----------------------|--------------------------|------------|
| Lump-sum retirement benefits | 143 | (27) | 8 | 124 |
| Long-service awards | 26 | (4) | - | 22 |
| Other post-employment benefits (pensions) | 7 | (20) | 18 | 5 |
| Total | 176 | (51) | 26 | 151 |

These obligations are covered by non-current provisions.

20.2.2. EMPLOYEE BENEFIT OBLIGATIONS AND PENSION OBLIGATIONS (POST-EMPLOYMENT BENEFITS) EXCLUDING LONG-SERVICE AWARDS

20.2.2.1. Defined-contribution plans

| | 2022 | 2021 |
|---------------------------------|------|------|
| Amount recognised as an expense | 148 | 139 |

The figures disclosed above are the contributions paid to pension funds for compulsory and top-up schemes.

20.2.2.2. Defined-benefit plans (retirement benefit obligations)

a. Amounts recognised in the balance sheet

| | Lump-sum retirement benefits | | Pensions | | Total | |
|---|------------------------------|------------|------------|------------|------------|------------|
| | 31/12/2022 | 31/12/2021 | 31/12/2022 | 31/12/2021 | 31/12/2022 | 31/12/2021 |
| Present value of obligation | 124 | 143 | 269 | 304 | 393 | 447 |
| Fair value of plan assets (dedicated funds) | - | - | (363) | (360) | (363) | (360) |
| Asset ceiling | - | - | 99 | 63 | 99 | 63 |
| Net liability recognised | 124 | 143 | 5 | 7 | 129 | 150 |
| of which: deficit recognised as a provision | 124 | 143 | 5 | 7 | 129 | 150 |
| of which: overfunded plans recognised as an asset | - | - | - | - | - | - |
| Ratio of plan assets to present value of obligation | - | - | 135% | 118% | - | - |

The table below shows the split of the fair value of plan assets by investment category:

| | 2022 | 2021 |
|--------------------|-----------------|-----------------|
| Equity instruments | 65 18% | 75 21% |
| Debt instruments | 55 15% | 58 16% |
| Property | 130 36% | 105 29% |
| Investment funds | - 0% | - 0% |
| Cash | 8 2% | 9 3% |
| Other items | 105 29% | 113 31% |
| Total | 363 100% | 360 100% |

b. Movement in balance sheet items (non-current provisions)

| | Lump-sum retirement benefits | | Pensions | |
|---|------------------------------|------------|-----------|-----------|
| | 2022 | 2021 | 2022 | 2021 |
| Start of period | 143 | 196 | 7 | 76 |
| Current and past service cost | 10 | 12 | 15 | 21 |
| Interest cost | 2 | 1 | - | 1 |
| Total expense recognised | 12 | 13 | 15 | 22 |
| Reversals of provisions (benefits and contributions paid) | (20) | (18) | (37) | (34) |
| Translation adjustments | - | - | - | - |
| Changes in scope of consolidation | - | 1 | - | - |
| Actuarial gains and losses recognised in equity | (19) | (5) | - | 3 |
| Transfers and other movements | - | - | - | 3 |
| Held-for-sale operations | 8 | (44) | 20 | (63) |
| End of period | 124 | 143 | 5 | 7 |
| of which: deficit recognised as a provision | 124 | 143 | 5 | 7 |
| of which: overfunded plans recognised as an asset | - | - | - | - |

Actuarial gains and losses comprise the following:

| | Lump-sum retirement benefits | | Pensions | |
|--|------------------------------|------------|----------|----------|
| | 2022 | 2021 | 2022 | 2021 |
| Analysis of actuarial gains and losses recognised in equity | | | | |
| Effect of changes in demographic assumptions | (6) | (11) | 1 | (22) |
| Effect of changes in financial assumptions | (33) | (9) | (185) | (8) |
| Effect of experience adjustments | 20 | 15 | 17 | (4) |
| Return on plan assets (excluding financial income) | - | - | 184 | (85) |
| Effect of asset ceiling | - | - | (17) | 122 |
| Total | (19) | (5) | - | 3 |

c. Analysis by geographical area at 31 December 2022

| | France & overseas departments | European Union | Rest of Europe | Total |
|--|-------------------------------|----------------|----------------|------------|
| Non-current provisions (balance sheet): | | | | |
| • lump-sum retirement benefits | 124 | - | - | 124 |
| • pensions | - | 5 | - | 5 |
| Provisions recognised as liabilities | 124 | 5 | - | 129 |
| Overfunded plans recognised as an asset | - | - | - | - |
| Total | 124 | 5 | - | 129 |

d. Main actuarial assumptions used to measure post-employment benefit obligations

| | 2022 | 2021 |
|-------------------------------|-----------------------------------|-----------------------------------|
| Discount rate: | | |
| Lump-sum retirement benefits | 3.56% (iboxx € corporate A10+) | 1.01% (iboxx € corporate A10+) |
| Pensions | 2.30% to 3.48% | 0.2% to 1% |
| Salary inflation rate: | | |
| Lump-sum retirement benefits | 1.65% to 4.13% | 1.30% to 3.60% |
| Pensions | 1.5% to 4.5% | 1% to 2.5% |

Other economic and demographic assumptions have been applied locally to reflect the specific characteristics of individual countries.

The table below shows the impact on the provision of an additional increase or decrease in discount rates in France and outside France:

| | Assumption | Increase | Decrease |
|---------------------------------------|-----------------|----------|----------|
| Lump-sum retirement benefits (France) | 70 basis points | (7) | 7 |
| Pensions (outside France) | 50 basis points | - | - |

A rise of 50 basis points in the salary inflation rate in France would increase the provision by €5 million.

Those impacts would also be recognised in the consolidated statement of recognised income and expense.

NOTE 21. RELATED PARTY DISCLOSURES

Transactions with related parties mainly comprise:

- remuneration and benefits awarded to directors and senior executives;
- commercial and financial transactions with Bouygues group companies, or with companies over which Bouygues Construction exercises joint control or significant influence.

Identity of related parties:

- Parties with an ownership interest: Bouygues SA, and other companies owned by Bouygues SA.
- Joint operations: primarily construction project companies.
- Joint ventures and associates.
- Other related parties: mainly transactions with non-consolidated companies in which Bouygues Construction has an interest.

21.1. RELATED PARTY INFORMATION

Related party information includes held-for-sale operations.

| | Expenses | | Income | | Receivables | | Payables | |
|------------------------------------|--------------|--------------|------------|------------|--------------------|--------------|--------------|--------------|
| | 2022 | 2021 | 2022 | 2021 | 31/12/2022 | 31/12/2021 | 31/12/2022 | 31/12/2021 |
| Parties with an ownership interest | (132) | (133) | 116 | 114 | 4,454 ^a | 4,163 | 1,267 | 1,239 |
| Joint operations | (29) | (90) | 342 | 355 | 248 | 243 | 354 | 451 |
| Joint ventures and associates | (56) | (61) | 131 | 122 | 67 | 51 | 60 | 105 |
| Other related parties | 4 | - | 144 | 107 | 43 | 53 | 21 | 24 |
| Total | (213) | (284) | 733 | 698 | 4,812 | 4,510 | 1,702 | 1,819 |
| Due within less than 1 year | - | - | - | - | 4,733 | 4,442 | 821 | 965 |
| Due within 1 to 5 years | - | - | - | - | 31 | 26 | 881 | 854 |
| Due after more than 5 years | - | - | - | - | 47 | 42 | - | - |
| of which impairment of receivables | - | - | - | - | 59 | 56 | - | - |

(a) Includes Bouygues Relais €2,754 million, Uniservice €1,675 million.

The off balance sheet commitments reported in Note 19 do not include any commitments to related parties.

21.2. DISCLOSURES ABOUT REMUNERATION AND BENEFITS PAID TO DIRECTORS AND SENIOR EXECUTIVES

Disclosures about senior executives cover members of the General Management Committee, which had eleven members in post on 31 December 2022.

Direct remuneration amounted to €11,020 thousand, comprising €5,748 thousand of basic remuneration and €5,272 thousand of variable remuneration.

Short-term benefits: none.

Post-employment benefits: Members of the Group Management Committee belong to a top-up retirement scheme, management of which is contracted out to an insurance company. Contributions paid into the fund managed by the insurance company amounted to €788 thousand in 2022.

Long-term benefits: none.

Termination benefits: these amounted to €2,758 thousand as of 31 December 2022, including lump-sum retirement benefits.

Share-based payment: 137,500 stock options were awarded on 3 June 2022, at an exercise price of €31.771 each.

The earliest exercise date is 4 June 2024.

NOTE 22. ADDITIONAL CASH FLOW STATEMENT INFORMATION

22.1. CASH FLOWS OF ACQUIRED AND DIVESTED SUBSIDIARIES

Breakdown by business segment of net cash flows of continuing operations resulting from acquisitions and divestments of consolidated companies.

| | Total 2022 |
|--|-------------|
| Non-current assets | (26) |
| Current assets | - |
| Non-current liabilities | - |
| Current liabilities | 1 |
| Net cash position | - |
| Purchase price of consolidated activities net of disposals | (25) |
| Cash of acquired or divested companies | - |
| Net liabilities related to consolidated activities | 15 |
| Net cash inflow/(outflow) from acquisitions and divestments of subsidiaries | (10) |

In 2021, there were no acquisitions or divestments of consolidated entities relating to continuing operations and valued at more than €1 million.

22.2. DETERMINATION OF CHANGES IN WORKING CAPITAL REQUIREMENTS RELATED TO OPERATING ACTIVITIES

| | 2022 | 2021 |
|--|-------------|--------------|
| Assets | | |
| Inventories | (21) | 17 |
| Advances and down-payments made on orders | (14) | 20 |
| Trade receivables | 32 | 223 |
| Customer contract assets | (23) | 64 |
| Other current receivables and current financial assets | 76 | 60 |
| Sub-total^a | 50 | 384 |
| Liabilities | | |
| Trade payables | 125 | (240) |
| Customer contract liabilities | (132) | (29) |
| Current provisions | (84) | 10 |
| Other current payables and current financial liabilities | (5) | 146 |
| Sub-total^b | (96) | (113) |
| Changes in working capital requirements related to operating activities | (46) | 271 |

(a) Assets: decrease / (increase)

(b) Liabilities: (decrease) / increase

NOTE 23. AUDITORS' FEES

The table below shows fees paid to the auditors (and member firms of their networks) responsible for the audit of the consolidated financial statements of Bouygues Construction and fully consolidated companies, as expensed through the income statement in 2022 (in € '000).

| | Mazars network | | | Ernst & Young network | | | Other firms | | | Total fee expense | |

AUDITORS' REPORT ON THE CONSOLIDATED FINANCIAL STATEMENTS

Year ended 31 December 2022

To the Annual General Meeting of Bouygues Construction

OPINION

In accordance with the assignment entrusted to us by your Annual General Meetings, we have conducted our audit of the accompanying consolidated financial statements of Bouygues Construction for the year ended 31 December 2022.

In our opinion, the consolidated financial statements give a true and fair view of the assets and liabilities and of the financial position of the Group as at 31 December 2022, and of the results of its operations for the year then ended, in accordance with International Financial Reporting Standards (IFRS) as endorsed by the European Union.

BASIS FOR OUR OPINION

Auditing standards

We conducted our audit in accordance with professional standards applicable in France. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Our responsibilities under those standards are described in the section "Auditors' responsibilities for the audit of the consolidated financial statements" below.

Independence

We conducted our audit engagement in compliance with the rules on independence contained in the French Commercial Code and in the code of ethics of the auditing profession during the period from 1 January 2022 to the date of issuance of this report.

EMPHASIS OF MATTER

Without modifying the opinion expressed above, we draw your attention to Note 1.1 to the consolidated financial statements, which explains the classification of the Energies & Services business in the "Held-for-sale assets and operations and discontinued operations" category in accordance with IFRS 5 pending the transfer of that business to Equans.

JUSTIFICATION OF OUR ASSESSMENTS

Pursuant to Articles L. 823-9 and R. 823-7 of the French Commercial Code regarding the justification of our assessments, we draw your attention to the following assessments that in our professional judgment were of the most significance in the audit of the consolidated financial statements for the year.

Our assessments should be seen in the context of the audit of the consolidated financial statements taken as a whole, and of the formation of our opinion as expressed above. We do not express an opinion on elements of the consolidated financial statements taken in isolation..

- The Bouygues Construction group accounts for profits and losses on long-term contracts using the policies described in Note 2.4.3 to the consolidated financial statements. Such profits and losses are dependent on estimates made by the Group of profits or losses to completion on contracts and on metrics used by the Group to determine the percentage of completion. Based on the information supplied to us, our procedures included assessing the data and assumptions underlying the estimates of profits or losses to completion on contracts, and evaluating the key controls used by the Group to measure profits or losses to completion. Our assessment also included reasonableness tests on the estimates used, and on the resulting measurement of profits or losses on a percentage of completion basis.
- The Bouygues Construction group records provisions for litigation and claims, as presented in Notes 2.4.2, 6.1 and 6.2 to the consolidated financial statements; those provisions are intended to cover litigation, claims and foreseeable uncertainties relating to the Group's operations. Based on the information currently available, our assessment of those provisions included an examination of the situation and of the assumptions underlying the measurement of the provisions.

SPECIFIC VERIFICATIONS

As required by law and regulations we also carried out, in accordance with professional standards applicable in France, the specific verifications relating to information about the Group presented in the Board of Directors' management report.

We have no matters to report as to its fair presentation and its consistency with the consolidated financial statements.

RESPONSIBILITIES OF MANAGEMENT, AND OF THOSE CHARGED WITH GOVERNANCE, FOR THE CONSOLIDATED FINANCIAL STATEMENTS

It is the responsibility of management to prepare consolidated financial statements that give a true and fair view in accordance with IFRS as endorsed by the European Union, and to implement such internal control as it determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, it is the responsibility of management to assess the company's ability to continue as a going concern; to disclose in those financial statements any matters relating to going concern; and to apply the going concern basis of accounting unless it is intended to liquidate the company or cease trading.

The consolidated financial statements have been closed off by the Board of Directors.

AUDITORS' RESPONSIBILITIES FOR THE AUDIT OF THE CONSOLIDATED FINANCIAL STATEMENTS

It is our responsibility to prepare a report on the consolidated financial statements. Our objective is to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with professional standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error, and are considered material if, individually or in the aggregate, they could be reasonably expected to influence the economic decisions of users taken on the basis of these financial statements.

As specified in Article L.823-10-1 of the French Commercial Code, our audit does not involve guaranteeing the viability of the company or the quality of how it is managed.

As part of an audit in accordance with professional standards applicable in France, the auditor exercises professional judgment throughout the audit.

In addition, the auditor:

- identifies and assesses the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, designs and performs audit procedures responsive to those risks, to obtain audit evidence that is sufficient and appropriate to provide a basis for the auditor's opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;
- obtains an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of internal control;
- evaluates the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management in the consolidated financial statements;
- concludes on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the company's ability to continue as a going concern. Those conclusions are based on the audit evidence obtained up to the date of the auditor's report, with the caveat that future events or conditions may cause a company to cease to continue as a going concern. If the auditor concludes that a material uncertainty exists, the auditor is required to draw attention in the auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are not provided or are inadequate, to issue a qualified opinion or disclaimer;
- evaluates the overall presentation of the consolidated financial statements, and whether the consolidated financial statements represent the underlying transactions and events in a manner that gives a true and fair view of them; and
- obtains what the auditor considers sufficient appropriate audit evidence regarding the financial information of the entities within the group to express an opinion on the consolidated financial statements. The auditor is responsible for the direction, supervision and performance of the audit of the consolidated financial statements, and for the opinion expressed on those financial statements.
